

KENSINGTON
F U N D S

Kensington Active Advantage Fund

Summary Prospectus

March 23, 2022

Class A Shares (KADAX)

Institutional Class Shares (KADIX)

Class C Shares (KADCX)

Before you invest, you may want to review the Kensington Active Advantage Fund's (the "Fund") prospectus, which contains more information about the Fund and its risks. The current Statutory Prospectus and Statement of Additional Information dated March 19, 2022, are incorporated by reference into this Summary Prospectus. You can find the Fund's Statutory Prospectus, Statement of Additional Information, reports to shareholders and other information about the Fund online at www.kensingtonassetmanagement.com/funds/documents. You can also get this information at no cost by calling the Fund (toll-free) at 866-303-8623.

Investment Objective: The Fund seeks total return.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may qualify for sales charge discounts on purchases of Class A shares if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Examples below.** More information about these and other discounts is available from your financial professional and in **How to Purchase Shares** on page 26 in the Prospectus.

Shareholder Fees (fees paid directly from your investment)	Class A	Institutional Class	Class C
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	4.75%	None	None
Maximum Deferred Sales Charge (Load) ⁽¹⁾ (as a % of original purchase price)	None	None	1.00%
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Class A	Institutional Class	Class C
Management Fees	1.25%	1.25%	1.25%
Distribution and/or Service (12b-1) Fees	0.25%	0.00%	1.00%
Other Expenses ⁽²⁾	0.23%	0.23%	0.23%
Acquired Fund Fees and Expenses ⁽³⁾	0.26%	0.26%	0.26%
Total Annual Fund Operating Expenses	1.99%	1.74%	2.74%
Fee Waivers ⁽⁴⁾	(0.13)%	(0.13)%	(0.13)%
Total Annual Fund Operating Expenses After Fee Waivers	1.86%	1.61%	2.61%

(1) The Fund's distributor may advance to, or reimburse, the Fund 1.00% of the purchase price in connection with 12b-1 fees advanced to authorized broker-dealers on purchases of Class C shares. However, when the distributor makes such a payment, the respective Class C shares are subject to a 1.00% contingent deferred sales charge ("CDSC") payable to the distributor on shares redeemed prior to the first 12 months after their purchase. Shareholders will be notified at the time of purchase if the shares purchased are subject to this CDSC.

(2) Other Expenses are based on estimated amounts for the current fiscal year.

(3) Acquired Fund Fees and Expenses ("AFFE") are indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund's financial highlights, when issued, because the financial statements include only the direct operating expenses incurred by the Fund and does not include the indirect costs of investing in other investment companies.

(4) Kensington Asset Management, LLC (the "Adviser") has contractually agreed to waive its management fee and pay Fund expenses to ensure that Total Annual Fund Operating Expenses (excluding AFPE, leverage/borrowing interest, interest expense, dividends paid on short sales, taxes, brokerage commissions, extraordinary expenses, and distribution (12b-1) fees and expenses) do not exceed 1.35% of the average net assets of the applicable share class. Fees waived and expenses paid by the Adviser may be recouped by the Adviser for a period of 36 months following the month during which such fee waiver and expense payment was made if such recoupment can be achieved without exceeding the expense limit in effect at the time the fee waiver and expense payment occurred and the expense limit in effect at the time of recoupment. The Operating Expense Limitation Agreement is indefinite in term and cannot be terminated through at least June 30, 2024. Thereafter, the agreement may be terminated at any time upon 60 days' written notice by the Trust's Board of Trustees (the "Board") or the Adviser.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

Class	1 Year	3 Years	5 Years	10 Years
A	\$655	\$1,058	\$1,485	\$2,672
Institutional	\$164	\$535	\$932	\$2,041
C	\$364	\$838	\$1,438	\$3,061

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance.

Principal Investment Strategies

The Adviser seeks to achieve the Fund's investment objective by employing a fund-of-funds approach that utilizes a proprietary trend-following process which seeks to benefit from longer-term trends in equity and fixed income markets. As part of this process, the Fund will take positions in these markets when the opportunity is deemed beneficial or invest in cash, cash equivalents, and U.S. Treasury securities when opportunities are deemed unfavorable. The size of the positions taken will relate to various factors, including the Adviser's systematic assessment of a trend and its likelihood of continuing, as well as the Adviser's estimate of the market's risk. The Adviser generally expects that the Fund will have exposure in both equities and fixed income securities, but at any one time the Fund may emphasize one asset class or invest solely in cash, cash equivalents, and U.S. Treasuries when both equity and fixed income markets are deemed to be unfavorable.

The Adviser's process is primarily centered around trend-following analysis, which evaluates multiple inputs to recognize and measure consistent and repeating behavioral patterns in the financial markets. The Adviser will evaluate daily inputs related to the prices of certain U.S. high-yield and long-term Treasury bond funds, U.S. equity market indices, and the number of NYSE-listed companies whose prices have increased and decreased each day to recommend allocations across asset classes. This process is intended to identify strength or weakness in particular asset classes based upon a convergence of factors which will help inform the Fund's overall asset allocation.

The Adviser generally expects that the Fund's portfolio will allocate roughly 50–70% of its exposure to equity securities and 30–50% of its exposure to fixed income instruments. Generally, when the Adviser determines that market conditions are favorable, the Adviser will increase exposure in equities and lower quality, higher-yielding fixed income securities. When the Adviser determines that market conditions are less favorable, the Adviser will increase exposure to better-quality fixed income securities and cash equivalents (e.g., money market instruments). As a result, at times the Fund may invest substantially all of its assets in cash, cash equivalents, and U.S. Treasury securities, and at times the Fund may predominantly be exposed to equity securities.

The Fund primarily seeks to achieve its target exposure by investing in other mutual funds or exchange-traded funds ("ETFs") ("underlying funds"). Underlying funds generally include those that track the returns of a broad-based U.S. equity market index, that invest in high-yield, income-producing securities, that pursue a balanced strategy, and those that invest in U.S. Treasury securities. Underlying funds that invest in equity securities may include companies of any market capitalization and may reflect companies based on certain factors, such as value- or growth-oriented companies. Underlying funds that invest in high-yield securities may utilize instruments including bills, notes, bonds, debentures, bank loans, loan participations, syndicated loan assignments and other evidence of indebtedness and are not restricted as to issuer credit quality, country, capitalization, security maturity, currency, or leverage. High-yield securities, also known as "junk bonds", are debt instruments rated lower than Baa3 by Moody's Investors Service, Inc. ("Moody's") or lower than BBB- by Standard and Poor's Rating Group ("S&P"), or, if unrated, determined by the underlying fund's adviser to be of similar credit quality. The underlying funds may invest in junk bonds that are in default, subject to bankruptcy or reorganization.

In selecting underlying funds, the Adviser considers the performance, relative fees, management experience, and underlying portfolio composition and strategy of such underlying funds. The Fund is non-diversified, which means it may invest a high percentage of its assets in a limited number of securities. The Fund will typically limit its investment in a single underlying fund to one percent of such underlying fund's net assets, although the percentage of such underlying fund owned by the Fund may change over time as the value of such investment changes and the Fund's overall portfolio changes. The Fund may also seek to replicate the holdings of an underlying fund (*i.e.*, invest in the same component companies of an underlying fund in approximately the same weights that they have in the underlying fund) in lieu of investing in the underlying fund itself and may invest directly in U.S. Treasury securities.

Principal Investment Risks

As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The Fund is not intended to be a complete investment program. Many factors affect the Fund's Net Asset Value and performance. The following risks apply to the Fund directly and indirectly through the Fund's investment in underlying funds.

- **Management Risk:** The Adviser's strategies and judgments about the attractiveness, value, and potential appreciation of particular assets may prove to be incorrect and may not produce the desired results.
- **Equity Securities Risk:** Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors, geographic markets, or companies in which the Fund invests.
- **Fixed-Income Securities Risks:** Fixed-income securities are or may be subject to interest rate, credit, liquidity, prepayment and extension risks. Interest rates may go up resulting in a decrease in the value of fixed-income securities. Credit risk is the risk that an issuer will not make timely payments of principal and interest. There is also the risk that an issuer may "call," or repay, its high yielding bonds before their maturity dates. Fixed-income securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate

environment. Limited trading opportunities for certain fixed-income securities may make it more difficult to sell or buy a security at a favorable price or time. Changes in market conditions and government policies may lead to periods of heightened volatility and reduced liquidity in the fixed-income securities market, and could result in an increase in redemptions. Interest rate changes and their impact on a fund and its share price can be sudden and unpredictable.

- *Interest Rate Risk.* In times of rising interest rates, bond prices will decline. Generally, securities with longer maturities and funds with longer weighted average maturities carry greater interest rate risk. The Fund may be exposed to heightened interest rate risk as interest rates rise from historically low levels.
- *Extension Risk.* In times of rising interest rates, prepayments will slow causing portfolio securities considered short or intermediate term to be long-term securities, which fluctuate more widely in response to changes in interest rates than shorter term securities.
- *Liquidity Risk.* There may be no willing buyer of a fund's portfolio securities and such fund may have to sell those securities at a lower price or may not be able to sell the securities at all, each of which would have a negative effect on performance.
- *Prepayment Risk.* In times of declining interest rates, a fund's higher yielding securities may be prepaid and such fund may have to replace them with securities having a lower yield.
- *Duration Risk.* The Fund can invest in securities of any maturity or duration. Holding long duration and long maturity investments will magnify certain risks, including interest rate risk and credit risk.
- *High-Yield Bond Risk:* Lower-quality fixed income securities, known as "high-yield" or "junk" bonds, present greater risk than bonds of higher quality, including an increased risk of default. These securities are considered speculative. Defaulted securities or those subject to a reorganization proceeding may become worthless and are illiquid.
- *Foreign Investment Risk:* Foreign investments may be riskier than U.S. investments for many reasons, such as changes in currency exchange rates and unstable political, social, and economic conditions.
- *Loans Risk:* The market for loans, including bank loans, loan participations, and syndicated loan assignments may not be highly liquid, and the holder may have difficulty selling them. These investments expose the Fund to the credit risk of both the financial institution and the underlying borrower. Bank loans settle on a delayed basis, which can be greater than seven days, potentially leading to the sale proceeds of such loans not being available for a substantial period of time after the sale of the bank loans.
- *Market Risk:* Overall investment market risks affect the value of the Fund. Factors such as economic growth and market conditions, interest rate levels, and political events affect U.S. and international investment markets. Additionally, unexpected local, regional or global events, such as war; acts of terrorism; financial, political or social disruptions; natural, environmental or man-made disasters; the spread of infectious illnesses or other public health issues (such as the global pandemic coronavirus disease 2019 (COVID-19)); and recessions and depressions could have a significant impact on the Fund and its investments and may impair market liquidity. Such events can cause investor fear, which can adversely affect the economies of nations, regions and the market in general, in ways that cannot necessarily be foreseen.
- *Underlying Funds Risk:* Investments in underlying funds involve duplication of investment advisory fees and certain other expenses. Each underlying fund is subject to specific risks, depending on the nature of its investment strategy. The manager of an underlying fund may not be successful in implementing its strategy. ETF shares may trade at a market price that may be lower (a discount) or higher (a premium) than the ETF's net asset value. ETFs are also subject to brokerage and/or other trading costs, which could result in greater expenses to the Fund. Because the value of ETF shares depends on the demand in the market, the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, adversely affecting performance.
- *Limited History of Operations Risk:* The Fund has a limited history of operations for investors to evaluate. The Fund may fail to attract sufficient assets to operate efficiently.
- *Non-Diversification Risk:* As a non-diversified fund, the Fund may invest more than 5% of its total assets in the securities of one or more issuers. The Fund also invests in underlying funds that are non-diversified. The Fund's performance may be more sensitive to any single economic, business, political or regulatory occurrence than the value of shares of a diversified investment company.
- *Small- and Mid-Capitalization Companies Risk:* Investing in the securities of small-capitalization and mid-capitalization companies involves greater risks and the possibility of greater price volatility than investing in larger capitalization and more-established companies. Investments in mid-cap companies involve less risk than investing in small-cap companies. Smaller companies may have limited operating history, product lines, and financial resources, and the securities of these companies may lack sufficient market liquidity. Mid-cap companies often have narrower markets and more limited managerial and financial resources than larger, more established companies.

- *Turnover Risk:* A higher portfolio turnover may result in higher transactional and brokerage costs. The Fund’s portfolio turnover rate is expected to be above 100% annually.
- *U.S. Government Securities Risk:* The Fund may invest directly or indirectly in obligations issued by agencies and instrumentalities of the U.S. government. The U.S. government may choose not to provide financial support to U.S. government sponsored agencies or instrumentalities if it is not legally obligated to do so, in which case, if the issuer defaulted, the Fund might not be able to recover its investment.
- *LIBOR Risk:* Changes related to the use of the London Interbank Offered Rate (LIBOR) or similar interbank offered rates (“IBORs,” such as the Euro Overnight Index Average (EONIA)) could have a diverse impacts on financial instruments that reference LIBOR or a similar rate. While some instruments may contemplate a scenario where LIBOR or a similar rate is no longer available by providing for an alternative rate setting methodology, not all instruments have such fallback provisions and the effectiveness of replacement rates is uncertain. The abandonment of LIBOR and similar rates could affect the value and liquidity of instruments that reference such rates, especially those that do not have fallback provisions. The use of alternative reference rate products may impact investment strategy performance.
- *Models and Data Risk:* The Fund’s investment exposure is heavily dependent on proprietary quantitative models as well as information and data supplied by third parties (“Models and Data”). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to securities being included in or excluded from the Fund’s portfolio that would have been excluded or included had the Models and Data been correct and complete. Some of the models used by the Fund are predictive in nature. The use of predictive models has inherent risks. For example, such models may incorrectly forecast future behavior, leading to potential losses. In addition, in unforeseen or certain low-probability scenarios (often involving a market disruption of some kind), such models may produce unexpected results, which can result in losses for the Fund.

Performance: As of the date of this Prospectus, the Fund does not have a full calendar year of performance as a mutual fund. When the Fund has been in operation for a full calendar year, performance information will be shown here. You should be aware that the Fund’s past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information and daily NAV per share is available at no cost by calling toll-free 866-303-8623.

Investment Adviser: Kensington Asset Management, LLC

Portfolio Managers:

Bruce P. DeLaurentis

Bruce P. DeLaurentis is Founder, Lead Portfolio Manager and Chairman of the Investment Committee for Kensington Asset Management. He has served the Fund since inception in 2022.

Patrick Sommerstad

Patrick Sommerstad serves as Co-Portfolio Manager and Investment Committee Member for Kensington Asset Management. He has served the Fund since inception in 2022.

Jason Sim

Jason Sim serves as Co-Portfolio Manager and Investment Committee Member for Kensington Asset Management. He has served the Fund since inception in 2022.

Jordan Flebotte

Jordan Flebotte serves as Co-Portfolio Manager and Investment Committee Member for Kensington Asset Management. He has served the Fund since inception in 2022.

Purchase and Sale of Fund Shares: The investment minimums for the Fund are:

Class	Initial Investment		Subsequent Investment	
	Regular Account	Retirement Account	Regular Account	Retirement Account
A	\$1,000	\$1,000	\$250	\$100
Institutional	\$25,000	\$25,000	\$250	\$100
C	\$1,000	\$1,000	\$250	\$100

The Fund or Adviser may waive any investment minimum. You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange (“NYSE”) is open. Redemption requests may be made in writing, by telephone, or through a financial intermediary and will be paid by ACH, check or wire transfer. Purchase and redemptions requests must be received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of regular trading on the NYSE (normally 4:00 p.m., Eastern Time) to assure ample time to transmit to the Fund prior to NAV pricing.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) Plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
