# Defender Strategy

## Q1 2024 Fact Sheet

### Objective

The Kensington Defender Strategy seeks capital preservation and total return. Total return consists of capital appreciation and income.

### Momentum-Based Approach

Using a momentum-based approach, the Strategy seeks to provide tactical exposure across global investment markets and asset types including domestic and international equities, commodities, real estate, and fixed income securities.

### Risk Mitigation

The use of non-correlated strategies that use active risk hedging to provide more consistent, less volatile results and seek to provide downside protection.

### Income Generation

The Strategy will seek to make quarterly income distributions from yield generated by Strategy holdings as well as a proprietary overlay process used to collect option premium with a defined downside risk.

### Tactical Allocation

The Strategy will seek to shift its global allocation using a proprietary momentum scoring system which seeks to identify asset classes demonstrating the highest momentum. The total number of positive momentum asset classes will dictate the overall percentage allocation to top scoring assets, with the ability to shift defensively as overall momentum scores increase.

### About

Kensington Asset Management specializes in powerful, data-driven decision models that apply to global investment markets. Our focus is to help provide investors with confidence through quantitative analytics by attempting to participate in rising markets, while taking steps to help avoid exposure during times of market decline or volatility.

The Kensington Defender Strategy is sub-advised by Liquid Strategies, LLC. The Strategy was devised as a solution to mitigate the issues associated with traditional buy-and-hold strategies, which often suffer from substantial drawdowns and high volatility.

The aim of the Strategy is to provide a reliable investment that defends the financial wellbeing of our investors, ensuring they have access to their funds when they need them most.
