

period. Rights are similar to warrants, but normally have a short duration and are distributed by the issuer to its shareholders. Although equity securities have a history of long term growth in value, their prices fluctuate based on changes in a company's financial condition and on overall market and economic conditions.

Investments in equity securities are subject to inherent market risks and fluctuations in value due to earnings, economic conditions and other factors beyond the control of the Adviser. As a result, the return and NAV of a Fund will fluctuate. Securities in a Fund's portfolio may not increase as much as the market as a whole and some undervalued securities may continue to be undervalued for long periods of time. Although profits in some Fund holdings may be realized quickly, it is not expected that most investments will appreciate rapidly.

Exchange-Traded Funds

The Fund may invest in a range of exchange-traded funds ("ETFs"). ETFs may include, but are not limited to, Standard & Poor's Depository Receipts ("SPDRs"), DIAMONDS, SM Nasdaq-100 Index Tracking Stock ("QQQs"), iShares, HOLDRs, Fidelity Select Portfolios, Select Sector SPDRs, Fortune e-50 and Fortune 50. Additionally, a Fund may invest in new exchange traded shares as they become available.

SPDRs represent ownership in the SPDR Trust, a unit investment trust that holds a portfolio of common stocks designed to closely track the price performance and dividend yield of the Standard & Poor's 500 Composite Stock Price Index™ ("S&P 500 Index"). SPDRs trade on the NYSE Arca under the symbol SPY. The value of SPDRs fluctuates in relation to changes in the value of the underlying portfolio of common stocks. A MidCap SPDR is similar to a SPDR except that it tracks the performance of the S&P MidCap 400 Index and trades on the NYSE Arca under the symbol MDY. DIAMONDS represent an investment in the DIAMONDS Trust, a unit investment trust that serves as an index to the Dow Jones Industrial Average (the "Dow") in that its holding consists of the 30 component stocks of the Dow. The DIAMONDS Trust is structured so that its shares trade at approximately 1/100 (one one-hundredth) of the value of the Dow Index. The DIAMONDS Trust's shares trade on the NYSE Arca under the symbol DIA. QQQs represent ownership in the Nasdaq-100 Trust, a unit investment trust that holds a portfolio of common stocks designed to track the price performance and dividend yield of the Nasdaq 100 Index by holding shares of all the companies on the Index. Shares trade on the NYSE Arca under the symbol QQQ. The iShares are managed by BlackRock ("BlackRock"). They track 80 different indexes, including sector/industry indexes (such as the S&P Financial Sector Index), bond indexes (such as the Barclay's Capital U.S. Aggregate Index and the Barclay's Capital 1-3 Year Treasury Bond Index) and international indexes (such as the S&P Europe 500 Index). Each iShares international ETF represents a broad portfolio of publicly traded stocks in a selected country. Each iShares international ETF seeks to generate investment results that generally correspond to the market yield performance of a given Morgan Stanley Capital International ("MSCI") Index. BlackRock offers six iShares fixed income ETFs that track a particular Barclay's Capital bond index. ETFs (both stock and fixed income) are subject to all of the common stock risks, and the international iShares are subject to all of the foreign securities risks described above. Investments in SPDRs, DIAMONDS, QQQs and iShares are considered to be investments in investment companies, see "Investments in Other Investment Companies" below.

When a Fund invests in sector ETFs, there is a risk that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If a Fund invests more heavily in a particular sector, the value of its shares may be especially sensitive to factors and economic risks that specifically affect that sector. As a result, a Fund's share price may fluctuate more widely than the value

of shares of a mutual fund that invests in a broader range of industries. Additionally, some sectors could be subject to greater government regulation than other sectors. Therefore, changes in regulatory policies for those sectors may have a material effect on the value of securities issued by companies in those sectors. The sectors in which a Fund may be more heavily invested will vary.

The shares of an ETF may be assembled in a block (typically 50,000 shares) known as a creation unit and redeemed in-kind for a portfolio of the underlying securities (based on the ETF's NAV) together with a cash payment generally equal to accumulated dividends as of the date of redemption. Conversely, a creation unit may be purchased from the ETF by depositing a specified portfolio of the ETF's underlying securities, as well as a cash payment generally equal to accumulated dividends of the securities (net of expenses) up to the time of deposit. A fund may redeem creation units for the underlying securities (and any applicable cash), and may assemble a portfolio of the underlying securities and use it (and any required cash) to purchase creation units, if a fund's manager believes it is in the relevant fund's interest to do so. A fund's ability to redeem creation units may be limited by the Investment Company Act of 1940, as amended (the "1940 Act"), which provides that the ETFs will not be obligated to redeem shares held by a fund in an amount exceeding one percent of their total outstanding securities during any period of less than 30 days.

There is a risk that the underlying ETFs in which a Fund invests may terminate due to extraordinary events that may cause any of the service providers to the ETFs, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which a Fund intends to invest may be granted licenses by agreement to use the indices as a basis for determining their compositions and/or otherwise to use certain trade names, the ETFs may terminate if such license agreements are terminated. In addition, an ETF may terminate if its entire NAV falls below a certain amount. Although a Fund believes that, in the event of the termination of an underlying ETF the Fund will be able to invest instead in shares of an alternate ETF tracking the same market index or another market index with the same general market, there is no guarantee that shares of an alternate ETF would be available for investment at that time. To the extent a Fund invests in a sector product, the Fund will be subject to the risks associated with that sector.

Foreign Securities

Purchases of foreign equity securities entail certain risks. For example, there may be less information publicly available about a foreign company than about a U.S. company, and foreign companies generally are not subject to accounting, auditing and financial reporting standards and practices comparable to those in the U.S. Other risks associated with investments in foreign securities include changes in restrictions on foreign currency transactions and rates of exchanges, changes in the administrations or economic and monetary policies of foreign governments, the imposition of exchange control regulations, the possibility of expropriation decrees and other adverse foreign governmental action, the imposition of foreign taxes, less liquid markets, less government supervision of exchanges, brokers and issuers, difficulty in enforcing contractual obligations, delays in settlement of securities transactions and greater price volatility. In addition, investing in foreign securities will generally result in higher commissions than investing in similar domestic securities.

Futures Contracts

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific security, class of securities, commodity, or an index at a specified future time and at a specified price. Futures contracts may be issued with respect to fixed-income securities, foreign

currencies, single stocks or financial indices, including indices of U.S. government securities, foreign government securities, and equity or fixed-income securities as well as commodities. U.S. futures contracts are traded on exchanges that have been designated “contract markets” by the Commodity Futures Trading Commission (the “CFTC”) and must be executed through a futures commission merchant (“FCM”), or brokerage firm, which is a member of the relevant contract market. Through their clearing corporations, the exchanges guarantee performance of the contracts between the clearing members of the exchange. A Fund may invest in futures traded on a foreign exchange, which may be subject to fewer regulations and investors protections.

The Funds may at times engage in futures transactions for hedging purposes or to enhance returns. This means that a purpose in entering into futures contracts is to protect the Fund from fluctuations in the value of securities or interest rates without actually buying or selling the underlying debt or equity security or other reference asset; or to seek outright returns. For example, if a Fund anticipates an increase in the price of stocks, and it intends to purchase stocks at a later time, the Fund could enter into a futures contract to purchase a stock index as a temporary substitute for stock purchases. If an increase in the market occurs that influences the stock index as anticipated, the value of the futures contracts will increase, thereby serving as a hedge against the Fund not participating in a market advance. This technique is sometimes known as an anticipatory hedge. Conversely, if a Fund holds stocks and seeks to protect itself from a decrease in stock prices, the Fund might sell stock index futures contracts, thereby hoping to offset the potential decline in the value of its portfolio securities by a corresponding increase in the value of the futures contract position. A Fund could protect against a decline in stock prices by selling portfolio securities and investing in money market instruments, but the use of futures contracts enables it to maintain a defensive position without having to sell portfolio securities.

If a Fund owns Treasury bonds and the portfolio manager expects interest rates to increase, the Fund may take a short position in interest rate futures contracts. Taking such a position would have much the same effect as the Fund selling Treasury bonds in its portfolio. If interest rates increase as anticipated, the value of the Treasury bonds would decline, but the value of the Fund’s interest rate futures contract will increase, thereby keeping the NAV of the Fund from declining as much as it may have otherwise. If, on the other hand, a portfolio manager expects interest rates to decline, a Fund may take a long position in interest rate futures contracts in anticipation of later closing out the futures position and purchasing the bonds. Although the Fund can accomplish similar results by buying securities with long maturities and selling securities with short maturities, given the greater liquidity of the futures market than the cash market, it may be possible to accomplish the same result more easily and more quickly by using futures contracts as an investment tool to reduce risk.

Risk Factors in Futures Transactions

Liquidity Risk. Because futures contracts are generally settled within a day from the date they are closed out, compared with a settlement period of two days for some types of securities, the futures markets can provide superior liquidity to the securities markets. Nevertheless, there is no assurance that a liquid secondary market will exist for any particular futures contract at any particular time. In addition, futures exchanges may establish daily price fluctuation limits for futures contracts and may halt trading if a contract’s price moves upward or downward more than the limit in a given day. On volatile trading days when the price fluctuation limit is reached, it may be impossible for a Fund to enter into new positions or close out existing positions. If the secondary market for a futures contract is not liquid because of price fluctuation limits or otherwise, the Fund may not be able to promptly liquidate unfavorable futures positions and potentially could be required to continue to hold a futures position until the delivery date,

regardless of changes in its value. As a result, the Fund's access to other assets held to cover its futures positions also could be impaired.

Risk of Loss. Although a Fund may believe that the use of such contracts will benefit the Fund, the Fund's overall performance could be worse than if the Fund had not entered into futures contracts if the Adviser's investment judgment proves incorrect. For example, if the Fund has hedged against the effects of a possible decrease in prices of securities held in its portfolio and prices increase instead, the Fund will lose part or all of the benefit of the increased value of these securities because of offsetting losses in its futures positions. In addition, if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements. Those sales may be, but will not necessarily be, at increased prices that reflect the rising market and may occur at a time when the sales are disadvantageous to the Fund.

The risk of loss in trading futures contracts in some strategies can be substantial, due both to the low margin deposits required, and the extremely high degree of leverage involved in futures pricing. Because the deposit requirements in the futures markets are less onerous than margin requirements in the securities market, there may be increased participation by speculators in the futures market that may also cause temporary price distortions. A relatively small price movement in a futures contract may result in immediate and substantial loss (as well as gain) to the investor. For example, if at the time of purchase, 10% of the value of the futures contract is deposited as margin, a subsequent 10% decrease in the value of the futures contract would result in a total loss of the margin deposit, before any deduction for the transaction costs, if the account were then closed out. Thus, a purchase or sale of a futures contract may result in losses in excess of the amount invested in the contract. A Fund will only engage in futures transactions when it is believed these risks are justified and will engage in futures transactions primarily for risk management purposes and to seek returns.

Correlation Risk. The prices of futures contracts depend primarily on the value of their underlying instruments or reference asset, such as a commodity. Because there are a limited number of types of futures contracts, it is possible that the standardized futures contracts available to a Fund will not match exactly the Fund's current or potential investments. A Fund may buy and sell futures contracts based on underlying instruments with different characteristics from the securities in which it typically invests for example, by hedging investments in portfolio securities with a futures contract based on a broad index of securities, which involves a risk that the futures position will not correlate precisely with the performance of the Fund's investments.

Futures prices can also diverge from the prices of their underlying instruments or reference asset, even if the underlying instruments closely correlate with the Fund's investments. Futures prices are affected by factors such as current and anticipated short-term interest rates, changes in volatility of the underlying instruments or reference asset and the time remaining until expiration of the contract. Those factors may affect securities or commodity prices differently from futures prices. Imperfect correlations between a Fund's investments and its futures positions also may result from differing levels of demand in the futures markets and the securities markets, from structural differences in how futures and securities or commodities are traded, and from imposition of daily price fluctuation limits for futures contracts. A Fund may buy or sell futures contracts with a greater or lesser value than the securities it wishes to hedge or is considering purchasing in order to attempt to compensate for differences in historical volatility between the futures contract and the securities, although this may not be successful in all cases. If price changes in a Fund's futures positions are poorly correlated with its other investments, its futures

positions may fail to produce desired gains or result in losses that are not offset by the gains in the Fund's other investments.

Margin Requirements:

The buyer or seller of a futures contract is not required to deliver or pay for the underlying instrument unless the contract is held until the delivery date. However, both the buyer and seller are required to deposit "initial margin" for the benefit of the FCM when the contract is entered into. Initial margin deposits:

- Are equal to a percentage of the contract's value, as set by the exchange on which the contract is traded; and
- Are similar to good faith deposits or performance bonds.

Unlike margin extended by a securities broker, initial margin payments do not constitute purchasing securities on margin for purposes of a Fund's investment limitations. If the value of either party's position declines, that party will be required to make additional "variation margin" payments for the benefit of the FCM to settle the change in value on a daily basis. The party that has a gain may be entitled to receive all or a portion of this amount. In the event of the bankruptcy of the FCM that holds margin on behalf of the Fund, the Fund may be entitled to return of margin owed to the Fund only in proportion to the amount received by the FCM's other customers. The Trust will attempt to minimize this risk by careful monitoring of the creditworthiness of the FCMs with which it does business and by depositing margin payments in a segregated account with the Trust's custodian.

SEC Segregation Requirements:

In addition to the margin restrictions discussed above, transactions in futures contracts may involve the segregation of funds pursuant to requirements imposed by the Securities and Exchange Commission (the "SEC"). Under those requirements, where a Fund has a long position in a futures contract, it may be required to establish a segregated account (not with a futures commission merchant or broker) containing cash or certain liquid assets equal to the purchase price of the contract (less any margin on deposit). For a short position in futures or forward contracts held by the Fund, those requirements may mandate the establishment of a segregated account (not with a futures commission merchant or broker) with cash or certain liquid assets that, when added to the amounts deposited as margin, equal the market value of the instruments underlying the futures contracts.

Liquidity Impact of Margin and SEC Segregation Requirements:

Although a Fund will segregate cash and liquid assets in an amount sufficient to cover its open futures obligations, the segregated assets will be available to the Fund immediately upon closing out the futures position, while settlement of securities transactions could take several days. However, because the Fund's cash that may otherwise be invested would be held uninvested or invested in other liquid assets so long as the futures position remains open, the Fund's return could be diminished due to the opportunity losses of foregoing other potential investments.

Cover for Futures Contracts:

Transactions involving futures contracts expose a Fund to an obligation to another party. A Fund will not enter into any such transactions unless it owns either: (1) an offsetting (“covered”) position in other futures contracts; or (2) cash and liquid assets with a value, marked-to-market daily, sufficient to cover its potential obligations to the extent not covered as provided in (1) above. The Fund will comply with SEC guidelines regarding cover for these instruments and will, if the guidelines so require, set aside cash or liquid assets in an account with an approved custodian, in the prescribed amount as determined daily. A Fund may enter into agreements with broker-dealers, which require the broker-dealers to accept physical settlement for certain futures contracts. If this occurs, the Fund would treat the futures contract as being cash-settled for purposes of determining the Fund’s coverage requirements.

Forward Contracts

A Fund may use forward contracts to achieve substantially similar strategies as those executed using futures contracts. A forward contract is an obligation to purchase or sell an asset at a future date at a price agreed upon by the parties. A Fund may either accept or make delivery of the asset at the maturity of the contract or, prior to maturity, enter into a closing transaction involving the purchase or sale of an offsetting contract. A Fund may engage in forward contracts for hedging or investment purposes. Forward contracts are not traded on regulated exchanges and incur the risk of default by the counter party to the transaction.

Foreign Currency Transactions

A Fund may enter into foreign currency futures contracts and forward currency contracts to hedge or seek returns. A foreign currency futures contract is a standardized contract for the future delivery of a specified amount of a foreign currency, at a future date at a price set at the time of the contract. A forward currency contract is an obligation to purchase or sell a currency against another currency at a future date at a price agreed upon by the parties. A Fund may either accept or make delivery of the currency at the maturity of the contract or, prior to maturity, enter into a closing transaction involving the purchase or sale of an offsetting contract. A Fund will engage in foreign currency futures contracts and forward currency transactions in anticipation of or to protect itself against fluctuations in currency exchange rates or as an investment strategy. Forward currency contracts are not traded on regulated commodities exchanges. Any Fund entering into a forward currency contract incurs the risk of default by the counter party to the transaction.

There can be no assurance that a liquid market will exist when a Fund seeks to close out a foreign currency futures or forward currency position, in which case the Fund might not be able to effect a closing purchase transaction at any particular time. While these contracts tend to minimize the risk of loss due to a decline in the value of the hedged currency, at the same time, they tend to limit any potential gain which might result should the value of such currency increase.

Although a Fund values assets daily in U.S. dollars, it does not intend to physically convert its holdings of foreign currencies into U.S. dollars on a daily basis. A Fund will do so from time to time and investors should be aware of the costs of currency conversion. Although foreign exchange dealers do not charge a fee for conversion, they do realize a profit based on the difference (the “spread”) between the prices at which they are buying and selling various currencies. Thus, a dealer may offer to sell a foreign currency

to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire to resell that currency to the dealer.

Options on Foreign Currencies

A Fund may invest in call and put options on domestic and foreign securities and foreign currencies. A Fund may purchase and write call and put options on foreign currencies as a hedge against changes in the value of the U.S. dollar (or another currency) in relation to a foreign currency in which portfolio securities of the Fund may be denominated, or as an investment strategy. A call option on a foreign currency gives the purchaser the right to buy, and a put option the right to sell, a certain amount of foreign currency at a specified price during a fixed period of time. A Fund may enter into closing sale transactions with respect to such options, exercise them, or permit them to expire.

A Fund may employ hedging strategies with options on currencies before the Fund purchases a foreign security denominated in the hedged currency, during the period the Fund holds the foreign security, or between the day the foreign security is purchased or sold and the date on which payment therefore is made or received. Hedging against a change in the value of a foreign currency in the foregoing manner does not eliminate fluctuations in the prices of portfolio securities or prevent losses if the prices of such securities decline. Furthermore, such hedging transactions reduce or preclude the opportunity for gain if the value of the hedged currency should increase relative to the U.S. dollar. A Fund will purchase options on foreign currencies for hedging purposes and may also speculate in options on foreign currencies. A Fund may invest in options on foreign currencies which are either listed on a domestic securities exchange or traded on a recognized foreign exchange.

An option position on a foreign currency may be closed out only on an exchange which provides a secondary market for an option of the same series. Although a Fund will typically purchase exchange-traded options, there is no assurance that a liquid secondary market on an exchange will exist for any particular option, or at any particular time. In the event no liquid secondary market exists, it might not be possible to effect closing transactions in particular options. If the Fund cannot close out an exchange-traded option which it holds, it would have to exercise its option in order to realize any profit and would incur transactional costs on the sale of the underlying assets.

Swap Agreements

A Fund may enter into swap agreements for purposes of attempting to gain exposure to equity, debt, commodities or other asset markets without actually purchasing those assets, or to hedge a position. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one year. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or “swapped” between the parties are calculated with respect to a “notional amount,” i.e., the return on or increase in value of a particular dollar amount invested in a “basket” of securities representing a particular index.

Most swap agreements entered into by a Fund calculate the obligations of the parties to the agreement on a “net basis.” Consequently, the Fund’s current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the “net amount”). Payments may be made at the conclusion of a swap agreement or periodically during its term.

Swap agreements do not involve the delivery of securities or other underlying assets. Accordingly, if a swap is entered into on a net basis, if the other party to a swap agreement defaults, a Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive, if any.

The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to a swap agreement entered into on a net basis will be accrued daily and an amount of cash or liquid asset having an aggregate NAV value at least equal to the accrued excess will be maintained in an account with the Custodian. The Fund will also establish and maintain such accounts with respect to its total obligations under any swaps that are not entered into on a net basis. Obligations under swap agreements so covered will not be construed to be "senior securities" for purposes of the Fund's investment restriction concerning senior securities.

Because they are two-party contracts and because they may have terms of greater than seven days, swap agreements may be considered to be illiquid for the Fund's illiquid investment limitations. A Fund will not enter into any swap agreement unless the Adviser believes that the other party to the transaction is creditworthy. The Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty.

A Fund may enter into a swap agreement in circumstances where the Adviser believes that it may be more cost effective or practical than buying the securities represented by such index or a futures contract or an option on such index. The counterparty to any swap agreement will typically be a bank, investment banking firm or broker/dealer. The counter-party will generally agree to pay the Fund the amount, if any, by which the notional amount of the swap agreement would have increased in value had it been invested in the particular stocks represented in the index, plus the dividends that would have been received on those stocks. The Fund will agree to pay to the counter-party a floating rate of interest on the notional amount of the swap agreement plus the amount, if any, by which the notional amount would have decreased in value had it been invested in such stocks. Therefore, the return to the Fund on any swap agreement should be the gain or loss on the notional amount plus dividends on the stocks less the interest paid by the Fund on the notional amount.

The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid in comparison with the markets for other similar instruments that are traded in the OTC market.

Regulation as a Commodity Pool Operator

The Adviser, with respect to the Funds, has filed with the National Futures Association, a notice claiming an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act, as amended, and Rule 4.5 of the Commodity Futures Trading Commission promulgated thereunder, with respect to the Fund's operations. Accordingly, neither the Fund, nor the Adviser is subject to registration or regulation as a commodity pool operator.

High Yield Securities

A Fund may invest in high yield securities. High yield, high risk bonds are securities that are generally rated below investment grade by the rating agencies (e.g., BB+ or lower by S&P and Ba1 or lower by Moody's). Other terms used to describe such securities include "lower rated bonds," "non-investment

grade bonds,” “below investment grade bonds,” and “junk bonds.” These securities are considered to be high-risk investments.

Risk Factors for Yield Securities:

Greater Risk of Loss. These securities are regarded as predominately speculative. There is a greater risk that issuers of lower rated securities will default than issuers of higher rated securities. Issuers of lower rated securities generally are less creditworthy and may be highly indebted, financially distressed, or bankrupt. These issuers are more vulnerable to real or perceived economic changes, political changes or adverse industry developments. In addition, high yield securities are frequently subordinated to the prior payment of senior indebtedness. If an issuer fails to pay principal or interest, a Fund would experience a decrease in income and a decline in the market value of its investments. An Underlying Fund also may incur additional expenses in seeking recovery from the issuer.

Sensitivity to Interest Rate and Economic Changes. The income and market value of lower-rated securities may fluctuate more than higher rated securities. Although non-investment grade securities tend to be less sensitive to interest rate changes than investment grade securities, non-investment grade securities are more sensitive to short-term corporate, economic and market developments. During periods of economic uncertainty and change, the market price of the investments in lower-rated securities may be volatile. The default rate for high yield bonds tends to be cyclical, with defaults rising in periods of economic downturn.

Valuation Difficulties. It is often more difficult to value lower-rated securities than higher-rated securities. If an issuer’s financial condition deteriorates, accurate financial and business information may be limited or unavailable. In addition, the lower-rated investments may be thinly traded and there may be no established secondary market. Because of the lack of market pricing and current information for investments in lower-rated securities, valuation of such investments is much more dependent on judgment than is the case with higher-rated securities.

Liquidity. There may be no established secondary or public market for investments in lower-rated securities. Such securities are frequently traded in markets that may be relatively less liquid than the market for higher rated securities. In addition, relatively few institutional purchasers may hold a major portion of an issue of lower-rated securities at times. As a result, an Underlying Fund that invests in lower-rated securities may be required to sell investments at substantial losses or retain them indefinitely even where an issuer’s financial condition is deteriorating.

Credit Quality. Credit quality of non-investment grade securities can change suddenly and unexpectedly, and even recently issued credit ratings may not fully reflect the actual risks posed by a particular high-yield security.

New Legislation. Future legislation may have a possible negative impact on the market for high yield, high risk bonds. As an example, in the late 1980’s, legislation required federally insured savings and loan associations to divest their investments in high-yield, high-risk bonds. New legislation, if enacted, could have a material negative effect on an Underlying Fund’s investments in lower-rated securities.

High-yield, high-risk investments may include the following:

Straight fixed-income debt securities. These include bonds and other debt obligations that bear a fixed or variable rate of interest payable at regular intervals and have a fixed or resettable maturity date. The particular terms of such securities vary and may include features such as call provisions and sinking funds.

Zero-coupon debt securities. These bear no interest obligation but are issued at a discount from their value at maturity. When held to maturity, their entire return equals the difference between their issue price and their maturity value.

Zero-fixed-coupon debt securities. These are zero-coupon debt securities that convert on a specified date to interest-bearing debt securities.

Pay-in-kind bonds. These are bonds which allow the issuer, at its option, to make current interest payments on the bonds either in cash or in additional bonds.

These are bonds commonly sold without registration under the Securities Act of 1933, as amended (“933 Act”), usually to a relatively small number of institutional investors.

Convertible Securities. These are bonds or preferred stock that may be converted to common stock.

Preferred Stock. These are stocks that generally pay a dividend at a specified rate and have preference over common stock in the payment of dividends and in liquidation.

Loan Participations and Assignments. These are participations in, or assignments of all or a portion of loans to corporations or to governments, including governments of less-developed countries (“LDCs”).

Securities issued in connection with Reorganizations and Corporate Restructurings. In connection with reorganizing or restructuring of an issuer, an issuer may issue common stock or other securities to holders of its debt securities.

Borrowing

While the Fund has no present intention to do so, they may engage in borrowing. Borrowing creates an opportunity for increased return, but, at the same time, creates special risks. Furthermore, if the Fund were to engage in borrowing, an increase in interest rates could reduce the value of the Fund’s shares by increasing the Fund’s interest expense. Subject to the limitations described under “Investment Limitations” below, the Fund may be permitted to borrow for temporary purposes and/or for investment purposes. Such a practice will result in leveraging of a Fund’s assets and may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so. This borrowing may be secured or unsecured. Provisions of the 1940 Act require a Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of the Fund’s total assets made for temporary purposes. Any borrowings for temporary purposes in excess of 5% of a Fund’s total assets will count against this asset coverage requirement. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from

an investment standpoint if the Fund sells securities at that time. Borrowing will tend to exaggerate the effect on NAV of any increase or decrease in the market value of the Fund's portfolio. Money borrowed will be subject to interest costs which may or may not be recovered by appreciation of the securities purchased, if any. The Fund also may be required to maintain minimum average balances in connection with such borrowings or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

Illiquid Investments

While the Fund has no present intention to do so, the Fund may be invested in securities that become illiquid investments, which may include securities that are not readily marketable and securities that are not registered under the Securities Act. A Fund may not acquire any illiquid investments if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. The term "illiquid investments" for this purpose means any investment that a fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment, as determined pursuant to the provisions of Rule 22e-4 under the 1940 Act. The Fund may not be able to sell illiquid investments when the Adviser considers it desirable to do so or may have to sell such investments at a price that is lower than the price that could be obtained if the investments were more liquid. In addition, the sale of illiquid investments also may require more time and may result in higher dealer discounts and other selling expenses than does the sale of investments that are more liquid. Illiquid investments also may be more difficult to value due to the unavailability of reliable market quotations for such investments, and investments in illiquid investments may have an adverse impact on NAV.

Institutional markets for restricted securities have developed as a result of the promulgation of Rule 144A under the Securities Act, which provides a safe harbor from Securities Act registration requirements for qualifying sales to institutional investors. When Rule 144A restricted securities present an attractive investment opportunity and otherwise meet selection criteria, a Fund may make such investments. Whether or not such investments are illiquid depends on the market that exists for the particular investment. It is not possible to predict with assurance exactly how the market for Rule 144A restricted securities or any other security will develop. An investment which when purchased enjoyed a fair degree of marketability may subsequently become illiquid. In such event, appropriate remedies are considered to minimize the effect on a Fund's liquidity.

Indexed Securities

A Fund may purchase indexed securities consistent with its investment objectives. Indexed securities are those, the value of which varies positively or negatively in relation to the value of other securities, securities indices or other financial indicators. Indexed securities may be debt securities or deposits whose value at maturity or coupon rate is determined by reference to a specific instrument or statistic. Issuers of indexed securities have included banks, corporations and certain U.S. Government agencies.

The performance of indexed securities depends to a great extent on the performance of the security or other instrument to which they are indexed and also may be influenced by interest rate changes in the U.S. and abroad. Indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline substantially if the issuer's creditworthiness deteriorates. Indexed securities may be more volatile than the underlying instruments. Certain indexed securities that are not traded on an established market may be deemed illiquid.

financing of needed housing. The principal activity of Freddie Mac currently consists of the purchase of first lien, conventional, residential mortgage loans and participation interests in such mortgage loans and the resale of the mortgage loans so purchased in the form of mortgage securities, primarily Freddie Mac Certificates.

Freddie Mac guarantees to each registered holder of a Freddie Mac Certificate the timely payment of interest at the rate provided for by such Freddie Mac Certificate, whether or not received. Freddie Mac also guarantees to each registered holder of a Freddie Mac Certificate ultimate collection of all principal of the related mortgage loans, without any offset or deduction, but does not generally guarantee the timely payment of scheduled principal. Freddie Mac may remit the amount due on account of its guarantee of collection of principal at any time after default on an underlying mortgage loan, but not later than 30 days following (i) foreclosure sale, (ii) payment of a claim by any mortgage insurer, or (iii) the expiration of any right of redemption, whichever occurs later, but in any event no later than one year after demand has been made upon the mortgagor for acceleration of payment of principal. The obligations of Freddie Mac under its guarantee are obligations solely of Freddie Mac and are not backed by the full faith and credit of the U.S. government.

Freddie Mac Certificates represent a pro rata interest in a group of mortgage loans (a “Freddie Mac Certificate group”) purchased by Freddie Mac. The mortgage loans underlying the Freddie Mac Certificates will consist of fixed rate or adjustable rate mortgage loans with original terms to maturity of between ten and thirty years, substantially all of which are secured by first liens on one-to-four family residential properties or multifamily projects. Each mortgage loan must meet the applicable standards set forth in the FHLMC Act. A Freddie Mac Certificate group may include whole loans, participation interests in whole loans and undivided interests in whole loans and participations comprising another Freddie Mac Certificate group.

Federal Home Loan Bank Securities. The Federal Home Loan Bank system (“FHLB”) was created in 1932 pursuant to the Federal Home Loan Bank Act. The FHLB was created to support residential mortgage lending and community investment. The FHLB consists of 12 member-banks which are owned by over 8,000 member community financial institutions. The FHLB provides liquidity for housing finance and community development by making direct loans to these community financial institutions, and through two FHLB mortgage programs, which help expand home ownership by giving lenders an alternative option for mortgage funding. Each member financial institution (typically a bank or savings and loan) is a shareholder in one or more of 12 regional FHLB banks, which are privately capitalized, separate corporate entities. Federal oversight, in conjunction with normal bank regulation and shareholder vigilance, assures that the 12 regional Banks will remain conservatively managed and well capitalized. The FHLB banks are among the largest providers of mortgage credit in the U.S.

The FHLB is also one of the world’s largest private issuers of fixed-income debt securities, and the Office of Finance serves as the FHLB’s central debt issuance facility. Debt is issued in the global capital markets and the Fund is channeled to member financial institutions to fund mortgages, community development, and affordable housing.

Securities issued by the FHLB are not obligations of the U.S. government and are not guaranteed by the U.S. government. The FHLB may issue either bonds or discount notes. The securities, issued pursuant to the Act, are joint and several unsecured general obligations of the FHLB banks. The bonds or discount notes will not limit other indebtedness that the FHLB banks may incur and they will not contain any financial or similar restrictions on the FHLB banks or any restrictions on their ability to secure other indebtedness. Under the Federal Home Loan Bank Act, the FHLB banks may incur other indebtedness

such as secured joint and several obligations of the FHLB banks and unsecured joint and several obligations of the FHL Banks, as well as obligations of individual FHLB banks (although current Federal Housing Finance Board rules prohibit their issuance).

Municipal Securities

A Fund may invest in securities issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. Although the interest earned on many municipal securities is exempt from federal income tax, a Fund may invest in taxable municipal securities.

Municipal securities share the attributes of a debt/fixed income securities in general, but are generally issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. The municipal securities which a Fund may purchase include general obligation bonds and limited obligation bonds (or revenue bonds), including industrial development bonds issued pursuant to former federal tax law. General obligation bonds are obligations involving the credit of an issuer possessing taxing power and are payable from such issuer's general revenues and not from any particular source. Limited obligation bonds are payable only from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source. Tax-exempt private activity bonds and industrial development bonds generally are also revenue bonds and thus are not payable from the issuer's general revenues. The credit and quality of private activity bonds and industrial development bonds are usually related to the credit of the corporate user of the facilities. Payment of interest on and repayment of principal of such bonds is the responsibility of the corporate user (and/or any guarantor).

Under the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), certain limited obligation bonds are considered "private activity bonds" and interest paid on such bonds is treated as an item of tax preference for purposes of calculating federal alternative minimum tax liability.

Options

A Fund may utilize call and put options, on securities and/or futures, to attempt to protect against possible changes in the market value of securities held in or to be purchased for the Fund's portfolio and to generate income or gain for the Fund. The ability of a Fund to successfully utilize options will depend on the Adviser's ability to predict pertinent market movements, which cannot be assured. A Fund will comply with applicable regulatory requirements when implementing these techniques and instruments.

A Fund may write (sell) covered call options and covered put options and purchase call and put options. The purpose of engaging in options transactions is to reduce the effect of price fluctuations of the securities owned by the Fund (and involved in the options) on the Fund's NAV per share and to generate additional revenues.

A covered call option is an option sold on a security owned by the seller of the option in exchange for a premium. A call option gives the purchaser of the option the right to buy the underlying securities at the exercise price during the option period. If the option is exercised by the purchaser during the option period, the seller is required to deliver the underlying security against payment of the exercise price. The seller's obligation terminates upon expiration of the option period or when the seller executes a closing purchase transaction with respect to such option. Call options on securities which a Fund sells (writes) will be covered or secured, which means that the Fund will own the underlying security or, to the extent it

does not hold such a security, will maintain a segregated account with the Fund's custodian consisting of liquid debt obligations equal to the market value of the option, marked to market daily. When a Fund writes a covered call option, it profits from the premium paid by the buyer but gives up the opportunity to profit from an increase in the value of the underlying security above the exercise price. At the same time, the seller retains the risk of loss from a decline in the value of the underlying security during the option period. Although the seller may terminate its obligation by executing a closing purchase transaction, the cost of effecting such a transaction may be greater than the premium received upon its sale, resulting in a loss to the seller if such an option expires unexercised, the seller realizes a gain equal to the premium received. Such a gain may be offset or exceeded by a decline in the market value of the underlying security during the option period. If an option is exercised, the exercise price, the premium received and the market value of the underlying security determine the gain or loss realized by the seller.

When a Fund sells a covered put option, it has the obligation to buy, and the purchaser of the put the right to sell, the underlying security at the exercise price during the option period. To cover a put option, the Fund deposits U.S. government securities (or other high-grade debt obligations) in a segregated account at its custodian. The value of the deposited securities is equal to or greater than the exercise price of the underlying security. The value of the deposited securities is marked to market daily and, if necessary, additional assets are placed in the segregated account to maintain a value equal to or greater than the exercise price. The Fund maintains the segregated account so long as it is obligated as the seller. The obligation of the Fund is terminated when the purchaser exercises the put option, when the option expires or when a closing purchase transaction is effected by the Fund. The Fund's gain on the sale of a put option is limited to the premium received plus interest earned on its segregated account. The Fund's potential loss on a put option is determined by taking into consideration the exercise price of the option, the market price of the underlying security when the put is exercised, the premium received and the interest earned on its segregated account. Although the Fund risks a substantial loss if the price of the security on which it has sold a put option drops suddenly, it can protect itself against serious loss by entering into a closing purchase transaction. The degree of loss will depend upon the Fund's ability to detect the movement in the security's price and to execute a closing transaction at the appropriate time.

A Fund will write options on such portion of its portfolio as management determines is appropriate in seeking to attain the relevant Fund's objective. A Fund will write options when management believes that a liquid secondary market will exist on a national securities exchange for options of the same series so that the Fund can effect a closing purchase transaction if it desires to close out its position. Consistent with the investment policies of the relevant Fund, a closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying security from being called or to permit the sale of the underlying security. Effecting a closing purchase transaction will permit the Fund to write another option on the underlying security with either a different exercise price or expiration date or both.

A Fund may purchase put options to protect against declines in the market value of portfolio securities or to attempt to retain unrealized gains in the value of portfolio securities. Put options might also be purchased to facilitate the sale of portfolio securities. A Fund may purchase call options as a temporary substitute for the purchase of individual securities, which then could be purchased in orderly fashion. Upon the purchase of the securities, the Fund would normally terminate the call position. The purchase of both put and call options involves the risk of loss of all or part of the premium paid. If the price of the underlying security does not rise (in the case of a call) or drop (in the case of a put) by an amount at least equal to the premium paid for the option contract, the Fund will experience a loss on the option contract equal to the deficiency.

Preferred Stock

Preferred stocks are securities that have characteristics of both common stocks and corporate bonds. Preferred stocks may receive dividends, but payment is not guaranteed as with a bond. These securities may be undervalued because of a lack of analyst coverage resulting in a high dividend yield or yield to maturity. The risks of preferred stocks are a lack of voting rights and the Adviser may incorrectly analyze the security, resulting in a loss to the relevant Fund. Furthermore, preferred stock dividends are not guaranteed, and management can elect to forego the preferred dividend, resulting in a loss to the Fund.

Publicly Traded Partnerships

A Fund may invest in publicly traded partnerships (“PTPs”). PTPs are limited partnerships the interests in which (known as “units”) are traded on public exchanges, just like corporate stock. PTPs are limited partnerships that provide an investor with a direct interest in a group of assets (generally, oil and gas properties). Publicly traded partnership units typically trade publicly, like stock, and thus may provide the investor more liquidity than ordinary limited partnerships. Publicly traded partnerships are also called master limited partnerships and public limited partnerships. A limited partnership has one or more general partners (they may be individuals, corporations, partnerships or another entity) which manage the partnership, and limited partners, which provide capital to the partnership but have no role in its management. When an investor buys units in a PTP, he or she becomes a limited partner. PTPs are formed in several ways. A non-traded partnership may decide to go public. Several non-traded partnerships may “roll up” into a single PTP. A corporation may spin off a group of assets or part of its business into a PTP of which it is the general partner, either to realize what it believes to be the assets’ full value or as an alternative to issuing debt. A corporation may fully convert to a PTP, although since 1986 the tax consequences have made this unappealing; or, a newly formed company may operate as a PTP from its inception.

There are different types of risks to investing in PTPs including regulatory risks and interest rate risks. Currently most partnerships enjoy pass through taxation of their income to partners, which avoids double taxation of earnings. If the government were to change PTP business tax structure, unitholders would not be able to enjoy the relatively high yields in the sector for long. In addition, PTP’s which charge government-regulated fees for transportation of oil and gas products through their pipelines are subject to unfavorable changes in government-approved rates and fees, which would affect a PTPs revenue stream negatively. PTPs also carry some interest rate risks. During increases in interest rates, PTPs may not produce decent returns to shareholders.

Income Trusts

A Fund may invest in income trusts which are investment trusts that hold assets that are income producing. The income is passed on to the “unitholders.” Each income trust has an operating risk based on its underlying business. The term may also be used to designate a legal entity, capital structure and ownership vehicle for certain assets or businesses. Shares or “trust units” are traded on securities exchanges just like stocks. Income is passed on to the investors, called unitholders, through monthly or quarterly distributions. Historically, distributions have typically been higher than dividends on common stocks. The unitholders are the beneficiaries of a trust, and their units represent their right to participate in the income and capital of the trust. Income trusts generally invest funds in assets that provide a return to the trust and its beneficiaries based on the cash flows of an underlying business. This return is often achieved through the acquisition by the trust of equity and debt instruments, royalty interests or real

properties. The trust can receive interest, royalty or lease payments from an operating entity carrying on a business, as well as dividends and a return of capital.

Each income trust has an operating risk based on its underlying business; and, typically, the higher the yield, the higher the risk. They also have additional risk factors, including, but not limited to, poorer access to debt markets. Similar to a dividend paying stock, income trusts do not guarantee minimum distributions or even return of capital. If the business starts to lose money, the trust can reduce or even eliminate distributions; this is usually accompanied by sharp losses in a unit's market value. Since the yield is one of the main attractions of income trusts, there is the risk that trust units will decline in value if interest rates offering in competing markets, such as in the cash/treasury market, increase. Interest rate risk is also present within the trusts themselves because they hold very long-term capital assets (e.g. pipelines, power plants, etc.), and much of the excess distributable income is derived from a maturity (or duration) mismatch between the life of the asset, and the life of the financing associated with it. In an increasing interest rate environment, not only does the attractiveness of trust distributions decrease, but quite possibly, the distributions may themselves decrease, leading to a double whammy of both declining yield and substantial loss of unitholder value. Because most income is passed on to unitholders, rather than reinvested in the business, in some cases, a trust can become a wasting asset unless more equity is issued. Because many income trusts pay out more than their net income, the unitholder equity (capital) may decline over time. To the extent that the value of the trust is driven by the deferral or reduction of tax, any change in government tax regulations to remove the benefit will reduce the value of the trusts. Generally, income trusts also carry the same risks as dividend paying stocks that are traded on stock markets.

Real Estate Investment Trusts (“REITs”)

A Fund may invest in equity interests or debt obligations issued by REITs. REITs are pooled investment vehicles which invest primarily in income producing real estate or real estate related loans or interest. REITs are generally classified as equity REITs, mortgage REITs or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling property that has appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. Similar to investment companies, REITs are not taxed on income distributed to shareholders provided they comply with several requirements of the Internal Revenue Code. A Fund will indirectly bear its proportionate share of expenses incurred by REITs in which the Fund invests in addition to the expenses incurred directly by the relevant Fund.

Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified, are subject to heavy cash flow dependency, default by borrowers and self-liquidation. REITs are also subject to the possibilities of failing to qualify for tax free pass-through of income under the Internal Revenue Code and failing to maintain their exemption from registration under the 1940 Act.

REITs (especially mortgage REITs) are also subject to interest rate risks. When interest rates decline, the value of a REIT's investment in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT's investment in fixed-rate obligations can be expected to decline. In contrast, as interest rates on adjustable rate mortgage loans are reset periodically, yields on a REIT's

investment in such loans will gradually align themselves to fluctuate less dramatically in response to interest rate fluctuations than would investments in fixed-rate obligations.

Investment in REITs involves risks similar to those associated with investing in small capitalization companies. These risks include:

- limited financial resources;
- infrequent or limited trading;
- more abrupt or erratic price movements than larger company securities; and
- in addition, small capitalization stocks, such as REITs, historically have been more volatile in price than the larger capitalization stocks included in the S&P 500 Index.

Repurchase Agreements

A Fund may invest in fully collateralized repurchase agreements. A repurchase agreement is a short-term investment in which the purchaser (i.e., the Fund) acquires ownership of a security and the seller agrees to repurchase the obligation at a future time at a set price, thereby determining the yield during the purchaser's holding period (usually not more than 7 days from the date of purchase). Any repurchase transaction in which the Fund engages will require full collateralization of the seller's obligation during the entire term of the repurchase agreement. In the event of a bankruptcy or other default of the seller, the Fund could experience both delays in liquidating the underlying security and losses in value. However, the Fund intends to enter into repurchase agreements only with its custodian, other banks with assets of \$1 billion or more and registered securities dealers determined by the Adviser to be creditworthy. The Adviser monitors the creditworthiness of the banks and securities dealers with which the Fund engages in repurchase transactions. A Fund may not enter into a repurchase agreement with a term of more than seven days if, as a result, more than 15% of the value of its net assets would then be invested in such repurchase agreements and other illiquid investments.

Reverse Repurchase Transactions

A Fund may enter into reverse repurchase transactions. In a reverse repurchase transaction, the Fund concurrently agrees to sell portfolio securities to financial institutions such as banks and broker-dealers, and to repurchase the same securities at a later date at a mutually agreed upon price. The repurchase price generally is equal to the original sales price plus interest. The Fund retains record ownership of the securities and the right to receive interest and principal payments. A Fund will enter into a reverse repurchase transaction in order to obtain funds to pursue additional investment opportunities with a return in excess of the cost of the reverse repurchase transaction. Such transactions may increase fluctuations in the market value of Fund assets and may be viewed as a form of leverage. Reverse purchase transactions also involve the risk that the market value of the securities sold by the Fund may decline below the price at which the Fund is obligated to repurchase the securities. In the event of bankruptcy or other default by the purchaser, the Fund could experience both delays in repurchasing the portfolio securities and losses. A Fund will enter into reverse purchase transactions only with parties whose creditworthiness has been reviewed and found satisfactory by the Adviser.

Reverse purchase transactions are considered by the SEC to be borrowings by a Fund under the 1940 Act. At the time a Fund enters into a reverse purchase transaction, it will direct its custodian to place, in a segregated account, assets (such as cash or liquid securities consistent with the Fund's investment

restrictions) having a value equal to the repurchase price (including accrued interest). The Fund will monitor the account to ensure that the market value of the account equals the amount of the Fund's commitments to repurchase securities.

Rights

Rights are usually granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock before it is issued to the public. The right entitles its holder to buy common stock at a specified price. Rights have similar features to warrants, except that the life of a right is typically much shorter, usually a few weeks. The Adviser believes rights may become underpriced if they are sold without regard to value and if analysts do not include them in their research. The risk in investing in rights is that the Adviser might miscalculate their value resulting in a loss to a Fund. Another risk is the underlying common stock may not reach the Adviser's anticipated price within the life of the right.

Short Sales

A Fund may seek to realize additional gains or hedge investments by selling a security short. A short sale is a transaction in which the Fund sells a security that it does not own in anticipation of a decline in the market price of the security. To complete the short sale, the Fund must arrange through a broker to borrow the security in order to deliver it to the buyer. The Fund is obligated to replace the borrowed security by purchasing it at a market price at or prior to the time it must be returned to the lender. The price at which the Fund is required to replace the borrowed security may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to repay the lender any dividends or interest attributable to the borrowed security that may accrue during the period of the loan. To borrow the security, the Fund may be required to pay a premium, which would increase the cost of the security sold. Until the short position is closed out, the Fund also will incur fees and other transaction costs.

The net proceeds of the short sale plus any additional cash collateral will be retained by the broker to the extent necessary to meet margin requirements and provide a collateral cushion in the event that the value of the security sold short increases. The Fund will receive the net proceeds after it closes out the short position by replacing the borrowed security. Until the Fund closes the short position, the Fund also must maintain a segregated account with its custodian consisting of cash or other liquid securities in an amount at least equal to (i) the current market value of the security sold short, (ii) less any collateral deposited with the broker (not including the proceeds of the short sale). The assets in the segregated account are marked to market daily. The collateral held by the broker and the segregated account with the custodian will not necessarily limit the Fund's potential loss on a short sale, which is unlimited.

A Fund will incur a loss if the price of the security increases between the date of the short sale and the date on which the Fund replaces the borrowed security. The Fund will realize a gain if the price of the security declines between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of any premium, dividend, interest or expenses the Fund may be required to pay in connection with the short sale. There can be no assurance that a Fund will be able to close out a short position at any particular time or at an acceptable price.

STRIPS

The Federal Reserve creates STRIPS (Separate Trading of Registered Interest and Principal of Securities) by separating the coupon payments and the principal payment from an outstanding Treasury security and

selling them as individual securities. To the extent a Fund purchases the principal portion of the STRIP, the Fund will not receive regular interest payments. Instead they are sold at a deep discount from their face value. The Fund will accrue income on such STRIPS for tax and accounting purposes, in accordance with applicable law, which income is distributable to shareholders. Because no cash is received at the time such income is accrued, the Fund may be required to liquidate other Fund securities to satisfy its distribution obligations. Because the principal portion of the STRIP does not pay current income, its price can be very volatile when interest rates change. In calculating its dividend, the Fund takes into account as income a portion of the difference between the principal portion of the STRIP's purchase price and its face value.

Time Deposits and Variable Rate Notes

A Fund may invest in fixed time deposits, whether or not subject to withdrawal penalties.

The commercial paper obligations which a Fund may buy are unsecured and may include variable rate notes. The nature and terms of a variable rate note (i.e., a "Master Note") permit the Fund to invest fluctuating amounts at varying rates of interest pursuant to a direct arrangement between the Fund as Lender, and the issuer, as borrower. It permits daily changes in the amounts borrowed. The Fund has the right at any time to increase, up to the full amount stated in the note agreement, or to decrease the amount outstanding under the note. The issuer may prepay at any time and without penalty any part of or the full amount of the note. The note may or may not be backed by one or more bank letters of credit. Because these notes are direct lending arrangements between the Fund and the issuer, it is not generally contemplated that they will be traded; moreover, there is currently no secondary market for them. Except as specifically provided in the Prospectus, there is no limitation on the type of issuer from whom these notes may be purchased; however, in connection with such purchase and on an ongoing basis, the Adviser will consider the earning power, cash flow and other liquidity ratios of the issuer, and its ability to pay principal and interest on demand, including a situation in which all holders of such notes made demand simultaneously. Variable rate notes are subject to each Fund's investment restriction on illiquid securities unless such notes can be put back to the issuer on demand within seven days.

U.S. Government Securities

A Fund may invest in U.S. government securities. These securities may be backed by the credit of the government as a whole or only by the issuing agency. U.S. Treasury bonds, notes, and bills and some agency securities, such as those issued by the Federal Housing Administration and the Government National Mortgage Association (Ginnie Mae), are backed by the full faith and credit of the U.S. government as to payment of principal and interest and are the highest quality government securities. Other securities issued by U.S. government agencies or instrumentalities, such as securities issued by the Federal Home Loan Banks and the Federal Home Loan Mortgage Corporation (Freddie Mac), are supported only by the credit of the agency that issued them, and not by the U.S. government. Securities issued by the Federal Farm Credit System, the Federal Land Banks, and the Federal National Mortgage Association (Fannie Mae) are supported by the agency's right to borrow money from the U.S. Treasury under certain circumstances, but are not backed by the full faith and credit of the U.S. government.

A Fund's investments in U.S. Government securities may include agency step-up obligations. These obligations are structured with a coupon rate that "steps-up" periodically over the life of the obligation. Step-up obligations typically contain a call option, permitting the issuer to buy back the obligation upon exercise of the option. Step-up obligations are designed for investors who are unwilling to invest in a long-term security in a low interest rate environment. Step-up obligations are used in an attempt to reduce

the risk of a price decline should interest rates rise significantly at any time during the life of the obligation. However, step-up obligations also carry the risk that market interest rates may be significantly below the new, stepped-up coupon rate. If this occurs, the issuer of the obligation likely will exercise the call option, leaving investors with cash to reinvest. As a result, these obligations may expose the Fund to the risk that proceeds from a called security may be reinvested in another security paying a lower rate of interest.

Warrants

Warrants are securities that are usually issued with a bond or preferred stock but may trade separately in the market. A warrant allows its holder to purchase a specified amount of common stock at a specified price for a specified time. The risk in investing in warrants is the Adviser might miscalculate their value, resulting in a loss to a Fund. Another risk is the warrants will not realize their value because the underlying common stock does not reach the Adviser's anticipated price within the life of the warrant.

When-Issued, Forward Commitments and Delayed Settlements

A Fund may purchase and sell securities on a when-issued, forward commitment or delayed settlement basis. In this event, the Fund's custodian will segregate liquid assets equal to the amount of the commitment in a separate account. Normally, the custodian will set aside portfolio securities to satisfy a purchase commitment. In such a case, the Fund subsequently may be required to segregate additional assets in order to assure that the value of the account remains equal to the amount of the Fund's commitment. It may be expected that the Fund's net assets will fluctuate to a greater degree when it sets aside portfolio securities to cover such purchase commitments than when it sets aside cash.

The Funds do not intend to engage in these transactions for speculative purposes but only in furtherance of its investment objectives. Because the Funds will segregate liquid assets to satisfy its purchase commitments in the manner described, a Fund's liquidity and the ability of the Adviser to manage them may be affected in the event the Fund's forward commitments, commitments to purchase when-issued securities and delayed settlements ever exceeded 15% of the value of its net assets.

A Fund will purchase securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, a Fund may dispose of or renegotiate a commitment after it is entered into and may sell securities it has committed to purchase before those securities are delivered to the Fund on the settlement date. In these cases, a Fund may realize a taxable capital gain or loss. When a Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in the Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of the Fund starting on the day the Fund agrees to purchase the securities. The Funds do not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

Fundamental and Non-Fundamental Investment Limitations

The Trust (on behalf of the Funds) has adopted the following restrictions as fundamental policies, which may not be changed without the favorable “vote of the holders of a majority of the outstanding voting securities” of a Fund, as defined under the 1940 Act. Under the 1940 Act, the “vote of the holders of a majority of the outstanding voting securities” means the vote of the holders of the lesser of (i) 67% of the shares of a Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented at the meeting in person or by proxy; or (ii) more than 50% of the outstanding shares of the Fund.

The Funds may not:

1. Issue senior securities, borrow money or pledge their assets, except that (i) a Fund may borrow from banks in amounts not exceeding one-third of its total assets (including the amount borrowed) less liabilities (other than borrowings); and (ii) this restriction shall not prohibit a Fund from engaging in options transactions, reverse repurchase agreements, purchasing securities on a when-issued, delayed delivery, or forward delivery basis, or short sales in accordance with its objectives and strategies;
2. Underwrite the securities of other issuers (except that a Fund may engage in transactions involving the acquisition, disposition or resale of its portfolio securities under circumstances where it may be considered to be an underwriter under the Securities Act);
3. Purchase or sell real estate or interests in real estate, unless acquired as a result of ownership of securities (although a Fund may purchase and sell securities which are secured by real estate and securities of companies that invest or deal in real estate);
4. Purchase or sell physical commodities or commodities contracts, unless acquired as a result of ownership of securities or other instruments and provided that this restriction does not prevent a Fund from engaging in transactions involving currencies and futures contracts and options thereon or investing in securities or other instruments that are secured by physical commodities;
5. Make personal loans of money or loans of its assets to persons who control or are under common control with a Fund (except that a Fund may lend its portfolio securities, enter into repurchase agreements, purchase debt securities consistent with the investment policies of the Fund, and invest in loans, including assignments and participation interests); or
6. Invest in the securities of any one industry or group of industries if, as a result, 25% or more of a Fund’s total assets would be invested in the securities of such industry or group of industries; except that, the foregoing does not apply to securities issued or guaranteed by the U.S. government, its agencies or instrumentalities or repurchase agreements with respect thereto.

Management of the Fund

Board of Trustees

The management and affairs of the Funds are supervised by the Board. The Board consists of four individuals. The Trustees are fiduciaries for the Funds' shareholders and are governed by the laws of the State of Delaware in this regard. The Board establishes policies for the operation of the Funds and appoints the officers who conduct the daily business of the Funds.

The Role of the Board of Trustees

The Board provides oversight of the management and operations of the Trust. Like all mutual funds, the day-to-day responsibility for the management and operation of the Trust is the responsibility of various service providers to the Trust and its individual series, such as the Adviser; Foreside Fund Services, LLC, the Funds' principal underwriter (the "Distributor"); U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, the Funds' administrator (the "Administrator") and transfer agent (the "Transfer Agent"); and U.S. Bank, N.A., the Funds' Custodian, each of whom are discussed in greater detail in this SAI. The Board approves all significant agreements between the Trust and its service providers, including the agreements with the Adviser, Distributor, Administrator, Custodian and Transfer Agent. The Board has appointed various individuals of certain of these service providers as officers of the Trust, with responsibility to monitor and report to the Board on the Trust's day-to-day operations. In conducting this oversight, the Board receives regular reports from these officers and service providers regarding the Trust's operations. The Board has appointed a Chief Compliance Officer ("CCO") who reports directly to the Board and who administers the Trust's compliance program and regularly reports to the Board as to compliance matters, including an annual compliance review. Some of these reports are provided as part of formal "Board Meetings," which are held four times per year, in person, and such other times as the Board determines is necessary, and involve the Board's review of recent Trust operations. From time to time one or more members of the Board may also meet with Trust officers in less formal settings, between formal Board Meetings, to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust, and its oversight role does not make the Board a guarantor of the Trust's investments, operations, or activities.

Board Leadership Structure

The Board has structured itself in a manner that it believes allows it to effectively perform its oversight function. The Board is comprised of four Trustees that are not considered to be "interested persons" of the Trust, as defined by the 1940 Act ("Independent Trustees") – Messrs. David A. Massart, Leonard M. Rush, David M. Swanson and Mr. Robert J. Kern. Accordingly, 100% of the members of the Board are Independent Trustees, who are Trustees that are not affiliated with any investment adviser to the Trust or their respective affiliates or other service providers to the Trust or any Trust series. Prior to July 6, 2020, Mr. Kern was considered an "interested person" of the Trust as defined in the 1940 Act ("Interested Trustee"). He was considered an Interested Trustee by virtue of the fact that he had served as a board member of Quasar Distributors, LLC, which acts as principal underwriter to many of the Trust's underlying funds and had been an Executive Vice President of the Administrator. The Board has established two standing committees, an Audit Committee and a Nominating & Governance Committee. The Board also oversees the work of the Valuation Committee that is comprised of certain officers of the Trust. The Committees are discussed in greater detail under "Board Committees" below. Each of the Audit Committee and the Nominating & Governance Committee are comprised entirely of Independent

Trustees. The Independent Trustees have engaged independent counsel to advise them on matters relating to their responsibilities in connection with the Trust.

The Independent Trustees have appointed Leonard M. Rush as Chairman. Prior to July 6, 2020, Mr. Kern served as Chairman of the Trust and Mr. Rush served as lead Independent Trustee with the responsibilities to coordinate activities of the Independent Trustees, act as a liaison with the Trust's service providers, officers, legal counsel, and other Trustees between meetings, help to set Board meeting agendas, and serve as chair during executive sessions of the Independent Trustees.

In accordance with the fund governance standards prescribed by the SEC under the 1940 Act, the Independent Trustees on the Nominating & Governance Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board because of his experience, qualifications, attributes and skills as set forth in the subsection "Trustee Qualifications" below.

The Board reviews its structure regularly in light of the characteristics and circumstances of the Trust, including: the affiliated or unaffiliated nature of each investment adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent distribution arrangements of each of the Trust's underlying funds.

The Board has determined that the inclusion of all Independent Trustees as members of the Audit Committee and the Nominating & Governance Committee allows all such Trustees to participate in the full range of the Board's oversight duties, including oversight of risk management processes discussed below. Given the composition of the Board and the function and composition of its various committees as described above, the Trust has determined that the Board's leadership structure is appropriate.

Board Oversight of Risk Management

As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel, including personnel of the Trust's service providers. Because risk management is a broad concept comprised of many elements (such as, for example, investment risk, issuer and counter-party risk, compliance risk, operational risk, business continuity risk, etc.) the oversight of different types of risks is handled in different ways. For example, the CCO regularly reports to the Board during Board Meetings and meets in executive session with the Independent Trustees and their legal counsel to discuss compliance and operational risks. In addition, Mr. Rush, the Independent Trustee designated as the Audit Committee's "audit committee financial expert", meets with the President, Treasurer and the Funds' independent registered public accounting firm to discuss, among other things, the internal control structure of the Funds' financial reporting function. The full Board receives reports from the investment advisers to the underlying funds and the portfolio managers as to investment risks.

Trustees and Officers

The Trustees and officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years.

Name, Address and Year of Birth	Position(s) Held with the Trust	Term of Office and Length of Time Served	Number of Portfolios in Trust Overseen by Trustee	Principal Occupation(s) During the Past Five Years	Other Directorships Held by Trustee During the Past Five Years
<i>Independent Trustees</i>					
Leonard M. Rush, CPA 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1946	Chairman, Trustee and Audit Committee Chairman	Indefinite Term; Since April 2011	33	Retired; Chief Financial Officer, Robert W. Baird & Co. Incorporated, (2000-2011).	Independent Trustee, ETF Series Solutions (59 Portfolios) (2012-Present); Director

Trustee Qualifications

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills appropriate to their continued service as Trustees of the Trust in light of the Trust's business and structure. The Trustees have substantial business and professional backgrounds that indicate they have the ability to critically review, evaluate and assess information provided to them. Certain of these business and professional experiences are set forth in detail in the table above. In addition, the Trustees have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. The Board annually conducts a "self-assessment" wherein the effectiveness of the Board and the individual Trustees is reviewed.

In addition to the information provided in the table above, below is certain additional information concerning each individual Trustee. The information provided below, and in the table above, is not all-inclusive. Many of the Trustees' qualifications to serve on the Board involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests.

Mr. Kern's trustee attributes include substantial industry experience, including his 37 years of service with U.S. Bancorp Fund Services, LLC (the fund accountant ("Fund Accountant"), Administrator, and Transfer Agent to the Trust) where he managed business development and the mutual fund Transfer Agent operation including investor services, account services, legal compliance, document processing and systems support. He also served as a board member of U.S. Bancorp Fund Services, LLC and previously served as a board member of Quasar Distributors, LLC (principal underwriter of multiple series of the Trust). The Board believes Mr. Kern's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Massart's trustee attributes include substantial industry experience, including over two decades working with high net worth individuals, families, trusts and retirement accounts to make strategic and tactical asset allocation decisions, evaluate and select investment managers and manage client relationships. He is currently Partner and Managing Director of Beacon Pointe Advisors, LLC. Previously, he served as Chief Investment Strategist and lead member of the investment management committee of the SEC registered investment advisory firm he co-founded. He also previously served as Managing Director of Strong Private Client and as a Manager of Wells Fargo Investments, LLC. The Board believes Mr. Massart's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Rush's trustee attributes include substantial industry experience, including serving in several different senior executive roles at various global financial services firms. He most recently served as Managing Director and Chief Financial Officer of Robert W. Baird & Co. Incorporated and several other affiliated entities and served as the Treasurer for Baird Funds. He also served as the Chief Financial Officer for Fidelity Investments' four broker-dealers and has substantial experience with mutual fund and investment advisory organizations and related businesses, including Vice President and Head of Compliance for Fidelity Investments, a Vice President at Credit Suisse First Boston, a Manager with Goldman Sachs, & Co. and a Senior Manager with Deloitte & Touche. Mr. Rush has been determined to qualify as an Audit Committee Financial Expert for the Trust. The Board believes Mr. Rush's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee.

Mr. Swanson's trustee attributes include substantial industry experience, including over 35 years of senior management and marketing experience with over 30 years dedicated to the financial services industry. He is currently the Founder and Managing Partner of a marketing strategy boutique serving asset and wealth management businesses. He has also served as Chief Operating Officer and Chief Marketing Officer of Van Kampen Investments, President and Chief Executive Officer of Scudder, Stevens & Clark, Canada, Ltd., Managing Director and Head of Global Investment Products at Morgan Stanley, Director of Marketing for Morgan Stanley Mutual Funds, Director of Marketing for Kemper Funds, and Executive Vice President and Head of Distribution for Calamos Investments. The Board believes Mr. Swanson's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

This discussion of the Trustees' experience and qualifications is pursuant to SEC requirements, does not constitute holding out the Board or any Trustee as having special expertise, and shall not impose any greater responsibility or liability on any such Trustee or the Board by reason thereof.

Trustee and Management Ownership of Fund Shares

The Funds had not commenced operations as of the date of this SAI and consequently, none of the Trustees or Officers of the Trust owned shares of the Funds as of such date.

As of the date of this SAI, none of the current Independent Trustees or their immediate family members owned beneficially any class of security of Kensington, the Distributor, or any entity (other than a registered investment company) directly or indirectly controlling, controlled by, or under common control with Kensington or the Distributor.

Board Committees

Audit Committee. The Trust has an Audit Committee, which is comprised of all the Independent Trustees. The Audit Committee reviews financial statements and other audit-related matters for the Funds. The Audit Committee also holds discussions with management and with the Funds' independent registered public accounting firm concerning the scope of the audit and the auditor's independence.

Nominating & Governance Committee. The Trust has a Nominating & Governance Committee, which is comprised of all the Independent Trustees. The Nominating & Governance Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary.

The Nominating & Governance Committee will consider nominees recommended by shareholders for vacancies on the Board. Recommendations for consideration by the Nominating & Governance Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed nominee, and such recommendation must comply with the notice provisions set forth in the Trust's Bylaws. In general, to comply with such procedures, such nominations, together with all required information, must be delivered to and received by the President of the Trust at the principal executive office of the Trust not later than 120 days, and no more than 150 days, prior to the shareholder meeting at which any such nominee would be voted on. Shareholder recommendations for nominations to the Board will be accepted on an ongoing basis. The Nominating & Governance Committee's procedures with respect to reviewing shareholder nominations will be disclosed as required by applicable securities laws.

Valuation Committee. The Trust has a Valuation Committee. The Board has delegated day-to-day valuation issues to the Valuation Committee that is comprised of certain officers of the Trust. Although the Valuation Committee is not a committee of the Board (i.e., no Trustee is a member of the Valuation Committee), the Valuation Committee’s membership is appointed by the Board and its charter and applicable procedures are approved by the Board. The Valuation Committee is responsible for the following: (1) monitoring the valuation of Fund securities and other investments; and (2) as required, determining the fair value of illiquid investments and other holdings after consideration of all relevant factors, which determinations are reported to the Board. The Valuation Committee is comprised of the Trust’s President, Treasurer and Assistant Treasurers. The Valuation Committee meets as necessary when a price for a portfolio security is not readily available.

Trustee Compensation

Prior to January 1, 2022, the Trustees received an annual retainer of \$105,000 per calendar year. Effective January 1, 2022, the Trustees receive an annual retainer of \$110,000. The Chairman of the Audit Committee receives additional compensation of \$14,000, the Chairman of the Nominating & Governance Committee receives additional compensation of \$8,000. The Lead Independent Trustee (now Chairman) receives \$12,500 annually. The Trustees receive \$6,000 for regularly scheduled meetings and \$2,500 for additional meetings.

The following table sets forth the estimated compensation expected to be received by the Trustees for the fiscal year ended December 31, 2022.

Name of Person/Position	Aggregate Compensation from the:			Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Fund and Fund Complex ⁽²⁾ Paid to Trustees
	Managed Income Fund ⁽¹⁾	Dynamic Growth Fund ⁽¹⁾	Active Advantage Fund ⁽¹⁾			
Leonard M. Rush, Chairman, Trustee and Audit Committee Chairman	\$2,432	\$2,432	\$2,432	None	None	\$7,296
David A. Massart, Independent Trustee and Valuation Committee Chairman	\$2,030	\$2,030	\$2,030	None	None	\$6,090
David M. Swanson, Independent Trustee and Nominating & Governance Committee Chairman	\$2,152	\$2,152	\$2,152	None	None	\$6,456
Robert J. Kern, Trustee	\$2,030	\$2,030	\$2,030	None	None	\$6,090

(1) Trustees fees and expenses are allocated among the Funds and any other series comprising the Trust.

(2) The Fund Complex consists of the Kensington Managed Income Fund, Kensington Dynamic Growth Fund, and Kensington Active Advantage Fund.

Control Persons and Principal Shareholders

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of a Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a Fund or acknowledges the existence of control. A controlling person possesses the ability to control the outcome of matters submitted for shareholder vote by a Fund. As of the date of this SAI, the Funds had not commenced operations and therefore there were no shares of the Funds outstanding.

Investment Adviser

Investment advisory services are provided to the Funds by the Adviser, Kensington Asset Management, LLC, pursuant to an investment advisory agreement (the “Advisory Agreement”).

Pursuant to the Advisory Agreement, the Adviser provides the Funds with investment research and advice and furnishes the Funds with an investment program consistent with the Funds’ investment objective and policies, subject to the supervision of the Board. The Adviser determines which portfolio securities will be purchased or sold, arranges for the placing of orders for the purchase or sale of portfolio securities, selects brokers or dealers to place those orders, maintains books and records with respect to the securities transactions and reports to the Board on the Funds’ investments and performance. Kensington is solely responsible for making investment decisions on behalf of the Funds. The Board will have sole responsibility for selecting, evaluating the performance of, and replacing as necessary any of the service providers to the Funds, including the Adviser.

After an initial two-year period, the Advisory Agreement will continue in effect from year to year, only if such continuance is specifically approved at least annually by: (i) the Board or the vote of a majority of the outstanding voting securities of the Funds; and (ii) the vote of a majority of the Independent Trustees, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement is terminable without penalty by the Trust, on behalf of a Fund, upon 60 days’ written notice to the Adviser, when authorized by either: (i) a majority vote of each Fund’s shareholders (with respect to such Fund); or (ii) by a vote of a majority of the Board or by the Adviser upon 60 days’ written notice to the Trust. The Advisory Agreement will automatically terminate in the event of its “assignment,” as defined under the 1940 Act. The Advisory Agreement provides that the Adviser under such agreement shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Funds, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

In consideration of the services provided by the Adviser pursuant to the Advisory Agreement, the Adviser is entitled to receive from the Funds a management fee computed daily and paid monthly, based on a percentage of each Fund’s average annual net assets, as specified in the Prospectus. However, the Adviser may voluntarily agree to reduce the management fees payable to it on a month-to-month basis, including additional fees above and beyond any contractual agreement the Adviser may have to reduce management fees and/or reimburse Fund expenses.

Fund Expenses. The Funds are responsible for their own operating expenses. Pursuant to an Operating Expenses Limitation Agreement between the Adviser and the Trust, on behalf of the Funds, the Adviser has agreed to waive its management fees and pay the Funds’ expenses, as specified in the Prospectus.

Fees waived and expenses paid by the Adviser may be recouped by the Adviser for a period of 36 months following the month during which such fee waiver and expense payment occurred, and the expense limit in effect at the time of recoupment. The Operating Expenses Limitation Agreement is indefinite in term, but cannot be terminated through at least June 30, 2024. Thereafter, the agreement may be terminated at any time upon 60 days' written notice by the Trust's Board or the Adviser.

The total advisory fees paid by each Predecessor Fund prior to the Reorganization during the fiscal periods ended December 31 are set forth in the following tables. These amounts were paid to Advisors Preferred Holdings, LLC, investment adviser to the Predecessor Funds. The Adviser to the Funds, Kensington Asset Management, LLC, served as investment sub-adviser to the Predecessor Funds and was compensated for these services by Advisors Preferred Holdings, LLC and not the Predecessor Funds.

Managed Income Predecessor Fund ⁽¹⁾

	2021	2020	2019
Advisory Fees Accrued	\$7,419,009	\$2,019,495	\$216,390
Advisory Fees Waived	\$—	\$—	\$(32,842)
Advisory Fees Recouped	\$—	\$32,842	\$—
Total Advisory Fees Paid to Adviser	\$7,419,009	\$2,052,337	\$183,548

⁽¹⁾ Managed Income Predecessor Fund commenced operations on May 28, 2019.

Dynamic Growth Predecessor Fund ⁽¹⁾

	2021	2020	2019
Advisory Fees Accrued	\$2,828,517	\$94,499	N/A
Advisory Fees Waived	\$—	\$(35,854)	N/A
Advisory Fees Recouped	\$35,854	\$—	N/A
Total Advisory Fees Paid to Adviser	\$2,864,371	\$58,645	N/A

⁽¹⁾ Dynamic Growth Predecessor Fund commenced operations on October 23, 2020.

The Kensington Active Advantage Fund had not commenced operations as of the date of this SAI and therefore there are no paid advisory fees to disclose for prior fiscal years.

Portfolio Manager

As disclosed in the Prospectus, Bruce P. DeLaurentis, Patrick Sommerstad, Jason Sim, and Jordan Flebotte are the portfolio managers (each a "Portfolio Manager" and together the "Portfolio Managers") and are responsible for the day-to-day management of the Funds.

The following table provides information regarding other accounts, excluding the Funds, managed by the Portfolio Manager as of December 31, 2021:

Portfolio Manager	Account Category	Number of Accounts	Total Assets in the Accounts	# of Accounts Paying a Performance Fee	Total Assets of Accounts Paying a Performance Fee
Bruce P. DeLaurentis	Registered investment companies	0	\$0	0	\$0
	Other pooled investment vehicles	0	\$0	0	\$0
	Other Accounts	1	\$1,000,000	0	\$0

Portfolio Manager	Account Category	Number of Accounts	Total Assets in the Accounts	# of Accounts Paying a Performance Fee	Total Assets of Accounts Paying a Performance Fee
Patrick Sommerstad	Registered investment companies	0	\$0	0	\$0
	Other pooled investment vehicles	0	\$0	0	\$0
	Other Accounts	0	\$0	0	\$0

Portfolio Manager	Account Category	Number of Accounts	Total Assets in the Accounts	# of Accounts Paying a Performance Fee	Total Assets of Accounts Paying a Performance Fee
Jason Sim	Registered investment companies	0	\$0	0	\$0
	Other pooled investment vehicles	0	\$0	0	\$0
	Other Accounts	0	\$0	0	\$0

Portfolio Manager	Account Category	Number of Accounts	Total Assets in the Accounts	# of Accounts Paying a Performance Fee	Total Assets of Accounts Paying a Performance Fee
Jordan Flebotte					
	Registered investment companies	0	\$0	0	\$0
	Other pooled investment vehicles	0	\$0	0	\$0
	Other Accounts	0	\$0	0	\$0

The Portfolio Managers' management of "other accounts" may give rise to conflicts of interest in connection with the management of a Fund's investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Funds. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby the Portfolio Manager could favor one account over another. Another potential conflict could include a Portfolio Manager's knowledge about the size, timing and possible market impact of Fund trades, whereby a Portfolio Manager could use this information to the advantage of other accounts and to the disadvantage of the Funds. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts it manages are fairly and equitably allocated.

The compensation for Mr. DeLaurentis is based on the net income generated by the Adviser and his relative ownership interest in the Adviser. The other Portfolio Managers' compensation includes a share of the advisory fee received by the Adviser, and a portion of such compensation will be determined based on a Fund's Morningstar quartile ranking at each quarter end, with higher rankings resulting in larger compensation amounts. Each Portfolio Manager is also entitled to participate in the Adviser's 401(k) retirement plan which is offered to all employees of the Adviser.

The following table indicates the dollar range of Predecessor Fund shares beneficially owned by each Portfolio Manager as of December 31, 2021. The Kensington Active Advantage Fund had not commenced operations as of the date of this SAI.

Portfolio Manager	Fund	Dollar Range of Shares Beneficially Owned (None, \$1-\$10,000; \$10,001-\$50,000; \$50,001-\$100,000; \$100,001 - \$500,000; \$500,001-\$1,000,000; Over \$1,000,000)
Bruce P. DeLaurentis	Managed Income Predecessor Fund	\$100,001-\$500,000
	Dynamic Growth Predecessor Fund	\$50,001-\$100,000
Patrick Sommerstad	Managed Income Predecessor Fund	None
	Dynamic Growth Predecessor Fund	None
Jason Sim	Managed Income Predecessor Fund	\$1-\$10,000
	Dynamic Growth Predecessor Fund	None
Jordan Flebotte	Managed Income Predecessor Fund	None
	Dynamic Growth Predecessor Fund	None

Service Providers

Pursuant to an administration agreement (the “Administration Agreement”) between the Trust and U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Fund Services”), 615 East Michigan Street, Milwaukee, Wisconsin, 53202, acts as the Administrator to the Fund. Fund Services provides certain administrative services to the Funds, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Funds’ independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Funds with applicable laws and regulations; arranging for the computation of performance data, including NAV per share and yield; responding to shareholder inquiries; arranging for the maintenance of books and records of the Funds; and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, Fund Services does not have any responsibility or authority for the management of the Funds, the determination of investment policy, or any matter pertaining to the distribution of Fund shares. Pursuant to the Administration Agreement, for its services, Fund Services receives from the Funds a fee computed daily and payable monthly based on the Funds’ average daily net assets, subject to an annual minimum fee. Fund Services also acts as Fund Accountant, Transfer Agent and dividend disbursing agent under separate agreements with the Trust.

Prior to the Reorganization, each Predecessor Fund paid administration fees, fund accounting fees and transfer agent fees to Gemini Fund Services, LLC during the fiscal periods ended December 31, as follows:

	2021	2020	2019
Managed Income Predecessor Fund ⁽¹⁾	\$616,061	\$252,051	\$69,902
Dynamic Growth Predecessor Fund ⁽²⁾	\$260,756	\$27,860	N/A

⁽¹⁾ Managed Income Predecessor Fund commenced operations on May 28, 2019.

⁽²⁾ Dynamic Growth Predecessor Fund commenced operations on October 23, 2020.

The Kensington Active Advantage Fund had not commenced operations as of the date of this SAI.

Ultimus Fund Solutions, LLC succeeded Gemini Fund Services, LLC on November 18, 2021.

Pursuant to a custody agreement between the Trust and the Fund, U.S. Bank N.A., an affiliate of Fund Services, serves as the custodian of the Funds’ assets (the “Custodian”). For its services, the Custodian receives a monthly fee based on a percentage of the Funds’ assets, in addition to certain transaction-based fees, and is reimbursed for out-of-pocket expenses. The Custodian’s address is 1555 North RiverCenter Drive, Suite 302, Milwaukee, Wisconsin, 53212. The Custodian holds the securities in the Funds’ portfolios and other assets for safekeeping. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Funds. U.S. Bank and its affiliates may participate in revenue sharing arrangements with service providers of mutual funds in which the Funds may invest.

Legal Counsel

Stradley Ronon Stevens & Young, LLP, 2005 Market Street, Suite 2600, Philadelphia, Pennsylvania 19103, serves as counsel to the Trust and as independent legal counsel to the Board.

Independent Registered Public Accounting Firm

Cohen & Company, Ltd., serves as the independent registered public accounting firm for the Funds. Its services include auditing the Funds' financial statements and performing related tax services.

Distribution of Fund Shares

The Trust has entered into a distribution agreement (the "Distribution Agreement") with Foreside Fund Services, LLC (the "Distributor"), 3 Canal Plaza, Suite 100, Portland, Maine 04101, pursuant to which the Distributor acts as the Funds' principal underwriter, provides certain administrative services, and promotes and arranges for the sale of the Funds' shares on a best efforts basis. The offering of the Funds' shares is continuous. The Distributor is not affiliated with the Adviser, Administrator, Fund Accountant or the Custodian. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). The Distributor does not receive compensation from the Funds for its distribution services. The Adviser pays the Distributor a fee for certain distribution-related services.

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Funds' outstanding voting securities and, in either case, by a majority of the Independent Trustees. The Distribution Agreement is terminable without penalty by the Trust, on behalf of the Funds, on 60 days' written notice when authorized either by a majority vote of a Fund's shareholders or by vote of a majority of the Board, including a majority of the Trustees who are not "interested persons" (as defined under the 1940 Act) of the Trust, or by the Distributor on 60 days' written notice, and will automatically terminate in the event of its "assignment," as defined in the 1940 Act.

Distribution (Rule 12b-1) Plan

The Funds have adopted a distribution plan for Class A shares and Class C shares pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plan"). Under the 12b-1 Plan, each Fund pays a fee to the Distributor for distribution and/or shareholder services (the "Distribution and Servicing Fee") at an annual rate of 0.25% of the Fund's average daily net assets of the Fund's Class A shares and 1.00% of the Fund's average daily net assets of the Fund's Class C shares. The 12b-1 Plan provides that the Distributor may use all or any portion of a Fund's Distribution and Servicing Fee to finance any activity that is principally intended to result in the sale of the Fund's shares, subject to the terms of the 12b-1 Plan, or to provide certain shareholder services. The 12b-1 Plan is intended to benefit each Fund by increasing its assets and thereby reducing the Fund's expense ratio.

The Distribution and Servicing Fee is payable to the Distributor regardless of the distribution-related expenses actually incurred. Because the Distribution and Servicing Fee is not directly tied to expenses, the amount of distribution fees paid by Class A and/or Class C shares during any year may be more or less than actual expenses incurred pursuant to the 12b-1 Plan. For this reason, this type of distribution fee arrangement is characterized by the staff of the SEC as a "compensation" plan.

The Distributor may use the Distribution and Servicing Fee to pay for services covered by the 12b-1 Plan including, but not limited to, advertising; compensating underwriters, dealers and selling personnel engaged in the distribution of Fund shares; the printing and mailing of prospectuses, statements of additional information, and reports; the printing and mailing of sales literature pertaining to the Funds; and obtaining whatever information, analyses, and reports with respect to marketing and promotional activities that a Fund may, from time to time, deem advisable.

The 12b-1 Plan provides that it will continue from year to year upon approval by the majority vote of the Board, including a majority of the Independent Trustees cast in person at a meeting called for that purpose, provided that such trustees have made a determination that there is a reasonable likelihood that the 12b-1 Plan will benefit each Fund and its shareholders. It is also required that the Independent Trustees, select and nominate all other trustees who are not “interested persons” of the Funds. The 12b-1 Plan and any related agreements may not be amended to materially increase the amounts to be spent for distribution expenses without approval of shareholders holding a majority of a Fund’s shares outstanding. All material amendments to the 12b-1 Plan or any related agreements must be approved by a vote of a majority of the Board and the Independent Trustees, cast in person at a meeting called for the purpose of voting on any such amendment.

The 12b-1 Plan requires that the Distributor provide to the Board, at least quarterly, a written report on the amounts and purpose of any payment made under the 12b-1 Plan. The Distributor is also required to furnish the Board with such other information as may reasonably be requested in order to enable the Board to make an informed determination of whether the 12b-1 Plan should be continued.

As noted above, the 12b-1 Plan provides for the ability to use Fund assets to pay financial intermediaries (including those that sponsor mutual fund supermarkets (as discussed below) and affiliates of the Adviser), plan administrators, and other service providers to finance any activity that is principally intended to result in the sale of Fund shares (distribution services) and for the provision of personal services to shareholders. The payments made by a Fund to financial intermediaries are based primarily on the dollar amount of assets invested in the Fund through the financial intermediaries. These financial intermediaries may pay a portion of the payments that they receive from the Fund to their investment professionals. In addition to the ongoing asset-based fees paid to these financial intermediaries under the 12b-1 Plan, a Fund may, from time to time, make payments under the 12b-1 Plan that help defray the expenses incurred by these intermediaries for conducting training and educational meetings about various aspects of the Fund for their employees. In addition, a Fund may make payments under the 12b-1 Plan for exhibition space and otherwise help defray the expenses these financial intermediaries incur in hosting client seminars where the Funds are discussed.

In addition, a Fund may participate in various “mutual fund supermarkets” in which a mutual fund supermarket sponsor (usually a broker-dealer) offers many mutual funds to the sponsor’s customers without charging the customers a sales charge. In connection with its participation in such platforms, the Distributor may use all or a portion of the Distribution and Servicing Fee to pay one or more supermarket sponsors a negotiated fee for distributing the Fund’s shares. In addition, in its discretion, the Adviser may pay additional fees to such intermediaries from its own assets.

Prior to the Reorganization and pursuant to a separate and different distribution plan as adopted by the Funds, for the fiscal year ended December 31, 2021, the Managed Income Predecessor Fund paid distribution (12b-1) fees of \$270,237 and the Dynamic Growth Predecessor Fund paid distribution (12b-1) fees of \$86,813. The table below reflects the allocation of such distribution fees paid.

	Managed Income Predecessor Fund	Dynamic Growth Predecessor Fund
Advertising/Marketing		
Printing/Postage		
Payment to distributor		
Payment to dealers	\$270,237	\$86,813
Compensation to sales personnel		
Other		
Total	\$270,237	\$86,813

The Kensington Active Advantage Fund had not commenced operations as of the date of this SAI.

Portfolio Transactions and Brokerage

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Funds and which broker-dealers are eligible to execute the Funds' portfolio transactions. Purchases and sales of securities on an exchange are effected through brokers that charge a commission while purchases and sales of securities in the OTC market will generally be executed directly with the primary "market-maker" unless, in the opinion of the Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction. Purchases and sales of portfolio securities that are fixed income securities (for instance, money market instruments and bonds, notes and bills) usually are principal transactions. In a principal transaction, the party from whom a Fund purchases or to whom a Fund sells is acting on its own behalf (and not as the agent of some other party, such as its customers). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. The price of securities purchased from underwriters includes a disclosed fixed commission or concession paid by the issuer to the underwriter, and prices of securities purchased from dealers serving as market makers reflects the spread between the bid and asked price. The price of OTC securities usually includes an undisclosed commission or markup.

Purchases of portfolio securities for a Fund will be effected through broker-dealers (including banks) that specialize in the types of securities that a Fund will be holding, unless better executions are available elsewhere. Dealers usually act as principal for their own accounts. Purchases from dealers will include a spread between the bid and the asked price. If the execution and price offered by more than one dealer are comparable, the order may be allocated to a dealer that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities, and other factors available, will be considered in making these determinations. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers that furnish or supply research and statistical information to the Adviser that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other brokerage services incidental to execution services. Research and statistical information may include reports that are common in the industry such as industry research reports and periodicals, quotation systems, software for portfolio management and

formal databases. Typically, the research will be used to service all of the Adviser's accounts, although a particular client may not benefit from all the research received on each occasion. The Adviser considers research information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Funds, to be useful in varying degrees, but of indeterminable value.

While it is the Funds' general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for a Fund, weight may also be given to the ability of a broker-dealer to furnish brokerage and research services to the Funds or to the Adviser, even if the specific services are not directly useful to the Funds and may be useful to the Adviser in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, a Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser's overall responsibilities to the Funds.

Investment decisions for the Funds are made independently from those of other client accounts of the Adviser and its affiliates. Nevertheless, it is often the case that identical securities will be acceptable for both the Funds and one or more of such other client accounts. In such event, the position of a Fund and such other client account(s) in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as a Fund at the same time, a Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, a Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the same security that a Fund is purchasing or selling, each day's transactions in such security will be allocated between a Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Funds are concerned. In other cases, however, it is believed that the ability of a Fund to participate in volume transactions may produce better executions for the Funds. Notwithstanding the above, the Adviser may execute buy and sell orders for accounts and take action in performance of its duties with respect to any of its accounts that may differ from actions taken with respect to another account, so long as the Adviser shall, to the extent practical, allocate investment opportunities to accounts, including the Funds, over a period of time on a fair and equitable basis and in accordance with applicable law.

Portfolio transactions may be placed with broker-dealers who sell shares of the Funds subject to rules adopted by FINRA and the SEC. Portfolio transactions may also be placed with broker-dealers in which the Adviser has invested on behalf of the Funds and/or client accounts.

The following table sets forth the amount of brokerage commissions paid by each Predecessor Fund prior to the Reorganization during the fiscal periods ended December 31:

	2021	2020	2019
Managed Income Predecessor Fund ⁽¹⁾	\$58,700	\$6,632	\$671
Dynamic Growth Predecessor Fund ⁽²⁾	\$28,541	\$20,731	N/A

⁽¹⁾ Managed Income Predecessor Fund commenced operations on May 28, 2019.

⁽²⁾ Dynamic Growth Predecessor Fund commenced operations on October 23, 2020.

The increase in brokerage commissions in 2020 for the Target Income Fund is as a result of the Fund operating for a partial year in 2019 when it commenced operations.

The increase in brokerage commissions in 2021 for the Target Income Fund is as a result of the Fund's increase in asset size in 2021.

The Kensington Active Advantage Fund had not commenced operations as of the date of this SAI.

Portfolio Turnover

A Fund may sell a portfolio investment soon after its acquisition if the Adviser believes that such a disposition is consistent with attaining the investment objective of the Fund. A Fund's investments may be sold for a variety of reasons, such as a more favorable investment opportunity or other circumstances bearing on the desirability of continuing to hold such investments. A high rate of portfolio turnover (over 100%) may involve correspondingly greater transaction costs, which must be borne directly by the Fund and ultimately by its shareholders. High portfolio turnover may result in the realization of substantial net capital gains. To the extent short-term capital gains are realized, distributions attributable to such gains will be ordinary income for federal income tax purposes.

Each Predecessor Fund's portfolio turnover rate for the fiscal periods ended December 31, was as follows:

	2021	2020
Managed Income Predecessor Fund ⁽¹⁾	220%	233%
Dynamic Growth Predecessor Fund ⁽²⁾	786%	277%

⁽¹⁾ Managed Income Predecessor Fund commenced operations on May 28, 2019.

⁽²⁾ Dynamic Growth Predecessor Fund commenced operations on October 23, 2020.

The increase in portfolio turnover in the Target Growth Fund in 2021 was as a result of the Fund operating for a partial year in 2020 when it commenced operations. In addition, due to the Fund's strategy being active, portfolio turnover is expected to vary over various time periods based on changing market dynamics.

The Kensington Active Advantage Fund had not commenced operations as of the date of this SAI.

Code of Ethics

The Trust and the Adviser have each adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These codes permit, subject to certain conditions, personnel of the Trust and Adviser to invest in securities that may be purchased or held by a Fund.

Proxy Voting Procedures

The Board has adopted proxy voting policies and procedures (“Proxy Policies”) wherein the Trust has delegated to the Adviser the responsibility for voting proxies relating to portfolio securities held by the Funds as part of the Adviser’s investment advisory services, subject to the supervision and oversight of the Board. Notwithstanding this delegation of responsibilities, however, the Funds retain the right to vote proxies relating to its portfolio securities. The fundamental purpose of the Proxy Policies is to ensure that each vote will be in a manner that reflects the best interest of the Funds and their shareholders, taking into account the value of the Funds’ investments.

The actual voting records relating to portfolio securities during the most recent 12-month period ended June 30 are available without charge, upon request, by calling toll-free, 866-303-8623, or by accessing the SEC’s website at www.sec.gov.

Anti-Money Laundering Compliance Program

The Trust has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”). To ensure compliance with this law, the Trust’s Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. Ms. Deborah Ward has been designated as the Trust’s Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to: determining that the Distributor and the Transfer Agent have established proper anti-money laundering procedures; reporting suspicious and/or fraudulent activity checking shareholder names against designated government lists, including Office of Foreign Asset Control (“OFAC”), and a complete and thorough review of all new opening account applications. The Funds will not transact business with any person or legal entity whose identity and beneficial owners, if applicable, cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, a Fund may be required to “freeze” the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Fund may be required to transfer the account or proceeds of the account to a governmental agency.

Portfolio Holdings Information

The Trust, on behalf of the Funds, has adopted portfolio holdings disclosure policies (“Portfolio Holdings Policies”) that govern the timing and circumstances of disclosure of portfolio holdings of the Funds. Information about a Fund’s portfolio holdings will not be distributed to any third party except in accordance with these Portfolio Holdings Policies. The Board has considered the circumstances under which a Fund’s portfolio holdings may be disclosed under the Portfolio Holdings Policies. The Board has also considered actual and potential material conflicts that could arise in such circumstances between the interests of a Fund’s shareholders and the interests of the Adviser, Distributor or any other affiliated person of the Funds. After due consideration, the Board has determined that the Funds have a legitimate business purpose for disclosing portfolio holdings to persons described in the Portfolio Holdings Policies.

The Board also has authorized its CCO to consider and authorize dissemination of portfolio holdings information to additional parties, after considering the best interests of the Funds' shareholders and potential conflicts of interest in making such disclosures.

The Board exercises continuing oversight of the disclosure of the Funds' portfolio holdings by (1) overseeing the implementation and enforcement of the Portfolio Holdings Policies, codes of ethics, and other relevant policies of the Funds and their service providers by the CCO, (2) by considering reports and recommendations by the CCO concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act), and (3) by considering whether to approve any amendment to these Portfolio Holdings Policies. The Board reserves the right to amend the Portfolio Holdings Policies at any time without prior notice in its sole discretion.

Disclosure of the Funds' complete holdings is required to be made quarterly within 60 days of the end of each fiscal quarter, in the annual and semi-annual reports to Fund shareholders, and in the quarterly holdings report on Form N-PORT. These reports will be made available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov. In addition, the Funds' complete holdings will be made available on a calendar quarter end basis, either via a holdings schedule or a shareholder report, with at least a sixty-day lag on the Funds' website, www.kensingtonassetmanagement.com/funds/documents.

In the event of a conflict between the interests of a Fund and its shareholders and the interests of the Adviser or an affiliated person of the Adviser, the CCO of the Adviser, in consultation with the Trust's CCO, shall make a determination in the best interests of the Funds and their shareholders, and shall report such determination to the Board at the end of the quarter in which such determination was made. Any employee of the Adviser who suspects a breach of this obligation must report the matter immediately to the Adviser's CCO or to his or her supervisor.

In addition, material non-public holdings information may be provided without a lag as part of the normal investment activities of the Funds to each of the following entities which, by explicit agreement or by virtue of their respective duties to the Funds, are required to maintain the confidentiality of the information disclosed: the Administrator; the Fund Accountant; the Custodian; the Transfer Agent; the Funds' independent registered public accounting firm; counsel to the Funds or the Board (current parties are identified in this SAI); broker-dealers (in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities); and regulatory authorities. Portfolio holdings information not publicly available with the SEC or on the Funds' web site may only be provided to additional third parties, in accordance with the Portfolio Holdings Policies, when a Fund has a legitimate business purpose, and the third party recipient is subject to a confidentiality agreement. Such portfolio holdings disclosure must be approved under the Portfolio Holdings Policies by the Trust's CCO.

In no event shall the Adviser, its affiliates or employees, or a Fund receive any direct or indirect compensation or other consideration in connection with the disclosure of information about the Funds' portfolio holdings.

There can be no assurance that the Portfolio Holdings Policies and these procedures will protect a Fund from potential misuse of Fund information by individuals or entities to which it is disclosed.

Determination of Net Asset Value

The NAV of the Funds' shares will fluctuate and is determined by the Fund Accountant as of the close of general trading on the New York Stock Exchange (the "NYSE") (generally 4:00 p.m., Eastern time) each

business day. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that it will not be open on the following days: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV per share is computed by determining the "Net Assets" of each class and dividing by the total number of shares outstanding of each class at such time. The Net Assets of the Funds are calculated by (1) taking the value of all assets, less liabilities, held by the Funds; and (2) subtracting "Accrued Expenses."

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{Net Asset Value Per Share}$$

The Funds' assets are valued at their market price on the valuation date and are based on valuations provided by independent pricing services consistent with the Trust's valuation procedures. When market prices are not readily available, a security or other asset is valued at its fair value as determined under fair value pricing procedures approved by the Board.

Each security owned by the Funds that is listed on a securities exchange is valued at its last sale price on that exchange on the date as of which assets are valued. Where the security is listed on more than one exchange, the Funds will use the price of the exchange that the Funds generally considers to be the principal exchange on which the stock is traded. If no sale is reported, the security is valued at the mean between the last available bid and asked price.

Portfolio securities primarily traded on the NASDAQ Stock Market ("NASDAQ") shall be valued using the NASDAQ Official Closing Price ("NOCP"), which may not necessarily represent the last sale price. If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has been no sale on such day, at the mean between the bid and asked prices. OTC securities that are not traded on NASDAQ shall be valued at the most recent trade price.

Fixed income securities are generally valued at the mean of the bid and asked prices as determined by an independent pricing service, taking into consideration recent transactions, yield, liquidity, risk, credit quality, coupon, maturity, type of issue and any other factors or market data the pricing service deems relevant. Participation Notes are valued at the mean between bid and ask prices. Investments in other investment companies, including money market funds, are valued at their NAV per share. Fixed income securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates fair value.

Foreign securities are generally valued in the same manner as the securities described above. Foreign securities are priced in the local currencies as of the close of their primary exchange or market or as of the close of trading on the NYSE, whichever is earlier. Foreign currencies are translated into U.S. dollars at the exchange rate as provided by a pricing service as of the close of trading on the NYSE.

Exchange traded options are generally valued at the composite price, using the National Best Bid and Offer quotes ("NBBO"). NBBO consists of the highest bid price and lowest ask price across any of the exchanges on which an option is quoted, thus providing a view across the entire U.S. options marketplace. Specifically, composite pricing looks at the last trades on the exchanges where the options

are traded. If there are no trades for the option on a given business day, composite pricing calculates the mean of the highest bid price and lowest ask price across the exchanges where the option is traded.

All other assets of the Fund are valued in such manner as the Board in good faith deems appropriate to reflect their fair value.

Purchase and Redemption of Fund Shares

Shares of the Funds are sold in a continuous offering and shares may be purchased or redeemed on any business day that the Funds calculate their NAV. The Funds may also authorize one or more financial intermediaries to accept purchase and redemption orders on its behalf (“Authorized Intermediaries”). Authorized Intermediaries are authorized to designate other Authorized Intermediaries to accept orders on the Funds’ behalf. An order is deemed to be received when the Funds or an Authorized Intermediary accepts the order.

Orders received by the Funds or an Authorized Intermediary by the close of trading on the NYSE (generally 4:00 p.m., Eastern Time) on a business day will be effected at the NAV per share determined as of the close of trading on the NYSE on that day. Otherwise, the orders will be processed at the next determined NAV.

Orders received by financial intermediaries that are not Authorized Intermediaries will be processed at the NAV next calculated after the Transfer Agent receives the order from the financial intermediary.

Purchase Requests Must be Received in Good Order

“Good order” means that your purchase request includes:

- The name of the Fund;
- The class of shares to be purchased;
- The dollar amount of shares to be purchased;
- Your account application or investment stub; and
- A check payable to the name of the Fund.

Shares of the Funds have not been registered for sale outside of the United States. The Funds generally do not sell shares to investors residing outside the United States, even if they are United States citizens or lawful permanent residents, except to investors with United States military APO or FPO addresses or in certain other circumstances where the Chief Compliance Officer and Anti-Money Laundering Officer for the Trust conclude that such sale is appropriate and is not in contravention of United States law.

Redemption Requests Must be Received in Good Order

Your share price will be based on the next NAV per share calculated after the Transfer Agent or an Authorized Intermediary receives your redemption request in good order. A redemption request will be deemed in “good order” if it includes:

- The shareholder’s name;
- The name of the Fund you are redeeming;
- The class of shares to be redeemed;
- The account number;
- The share or dollar amount to be redeemed; and
- Signatures by all shareholders on the account (with signature(s) guaranteed, if applicable).

Unless you instruct the Transfer Agent otherwise, redemption proceeds will be sent to the address of record. The Funds will not be responsible for interest lost on redemption amounts due to lost or misdirected mail.

A signature guarantee of each owner is required in the following situations:

- If ownership is changed on your account;
- When redemption proceeds are payable or sent to any person, address or bank account not on record;
- When a redemption is received by the Transfer Agent and the account address has changed within the last 15 calendar days; or
- For all redemptions in excess of \$100,000 from any shareholder account where the proceeds are requested to be sent by check.

Non-financial transactions, including establishing or modifying certain services on an account, may require a signature guarantee, signature verification from a Signature Validation Program member, or other acceptable form of authentication from a financial institution source. Signature guarantees, from either a Medallion program member or a non-Medallion program member, can be obtained from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program and the Securities Transfer Agents Medallion Program (“STAMP”), but not from a notary public.

The Funds may elect in the future to limit eligible signature guarantors to institutions that are members of a signature guarantee program. The Funds and the Transfer Agent reserve the right to amend these standards at any time without notice.

Redemption-In-Kind

Under normal circumstances, the Funds do not intend to redeem shares in any form except cash. The Trust, however, has filed a notice of election under Rule 18f-1 of the 1940 Act that allows a Fund to redeem in-kind redemption requests during any 90-day period in excess of the lesser of \$250,000 or 1% of the net assets of a Fund, valued at the beginning of such period. If a Fund pays your redemption proceeds by a distribution of securities, you could incur brokerage or other charges in converting the securities to cash, and will bear any market risks associated with such securities until they are converted into cash.

Cancellations and Modifications

The Funds will not accept a request to cancel or modify a written transaction once processing has begun.

Tax Matters

The following discussion is a summary of certain U.S. federal income tax considerations affecting the Funds and its shareholders. The discussion reflects applicable U.S. federal income tax laws of the U.S. as of the date of this SAI, which tax laws may be changed or subject to new interpretations by the courts or the Internal Revenue Service (the “IRS”), possibly with retroactive effect. No attempt is made to present a detailed explanation of all U.S. federal income, estate or gift, or state, local or foreign tax concerns affecting the Funds and its shareholders (including shareholders owning large positions in a Fund). The discussion set forth herein does not constitute tax advice. Investors are urged to consult their own tax advisers to determine the tax consequences to them of investing in the Funds.

Each series of the Trust is treated as a separate entity for federal income tax purposes. Each Fund, a series of the Trust, intends to qualify and elect to be treated as a RIC under Subchapter M of the Code, provided it complies with all applicable requirements regarding the source of its income, diversification of its assets and timing of distributions, as discussed below.

If for any taxable year a Fund fails to qualify for the special federal income tax treatment afforded to RICs, all of its taxable income will be subject to federal income tax at the corporate income tax rate (without any deduction for distributions to the Fund's shareholders) and its income available for distribution will be reduced.

As long as each Fund meets certain requirements that govern the Fund's source of income, diversification of assets and distribution of earnings to its shareholders, the Fund will not be subject to U.S. federal income tax on income distributed (or treated as distributed, as described below) to its shareholders. With respect to the source of income requirement, each Fund must derive in each taxable year at least 90% of its gross income (including tax-exempt interest) from (i) dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures and forward contracts) derived with respect to its business of investing in such shares, securities or currencies and (ii) net income derived from interests in qualified publicly traded partnerships ("QPTP"). A QPTP is generally defined as a publicly traded partnership under Section 7704 of the Code, but does not include a publicly traded partnership if 90% or more of its income is described in (i) above.

With respect to the diversification of assets requirement, each Fund must diversify its holdings so that, at the end of each quarter of each taxable year, (i) at least 50% of the value of the Fund's total assets is represented by cash and cash items, U.S. government securities, the securities of other RICs and other securities, with such other securities limited for purposes of such calculation, in respect of any one issuer, to an amount not greater than 5% of the value of a Fund's total assets and not more than 10% of the outstanding voting securities of such issuer at and (ii) not more than 25% of the value of a Fund's total assets is invested in the securities of any one issuer (other than U.S. government securities or the securities of other RICs), the securities (other than the securities of other RICs) of any two or more issuers that a Fund controls and that are determined to be engaged in the same, similar or related trades or businesses, or the securities of one or more QPTPs.

In addition, pursuant to the Code, a Fund may invest no more than 25% of its total assets in the securities of MLPs and other entities treated as QPTPs. A Fund will not be required to reduce a position due solely to market value fluctuations in order to comply with the 25% limitation in publicly traded partnerships, inclusive of MLP investments, but will not be able to purchase additional MLP securities unless the Fund is in compliance with the restriction.

The Funds' policy is to distribute to its shareholders substantially all of its net investment company taxable income and any net realized long-term capital gains for each fiscal year in a manner that complies with the distribution requirements of the Code, so that a Fund will not be subject to any federal income or excise taxes based on net income. However, a Fund can give no assurances that its anticipated distributions will be sufficient to eliminate all taxes. If a Fund does not qualify as a RIC, it would be taxed as a corporation and, in such case, it would be more beneficial for a shareholder to directly own the Fund's underlying investments rather than indirectly owning the underlying investments through the Fund. If a Fund fails to distribute (or be deemed to have distributed) by December 31 of each calendar year (i) at least 98% of its ordinary income for such year, (ii) at least 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period ending on October 31 during such

year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax, the Fund will be subject to a 4% excise tax.

Net investment income consists of interest, dividends, and short-term capital gains, less expenses. Net realized capital gains for a fiscal period are computed by taking into account any capital loss carryforward of a Fund.

Distributions of net investment income are taxable to shareholders as ordinary income. For individual shareholders, a portion of the distributions paid by a Fund may consist of qualified dividends eligible for taxation at the rate applicable to long-term capital gains to the extent a Fund designates the amount distributed as a qualified dividend and the shareholder meets certain holding period requirements with respect to his or her Fund shares. In the case of corporate shareholders, a portion of the distributions may qualify for the intercorporate dividends-received deduction to the extent that a Fund designates the amount distributed as eligible for deduction and the shareholder meets certain holding period requirements with respect to its Fund shares. The aggregate amount so designated to either individuals or corporate shareholders cannot, however, exceed the aggregate amount of such dividends received by a Fund for its taxable year. In view of the Funds' investment policies, it is expected that part of the distributions by a Fund may be eligible for the qualified dividend income treatment for individual shareholders and the dividends-received deduction for corporate shareholders. Any distributions to you in excess of a Fund's investment company taxable income and net capital gains will be treated by you, first, as a tax-deferred return of capital, which is applied against and will reduce the adjusted tax basis of your shares and, after such adjusted tax basis is reduced to zero, will generally constitute capital gains.

Any long-term capital gain distributions are taxable to shareholders as long-term capital gains regardless of the length of time shares have been held. Net capital gains distributions are not eligible for the qualified dividend income treatment or the dividends-received deduction referred to in the previous paragraph.

Any distributions to you in excess of a Fund's investment company taxable income and net capital gains will be treated by you, first, as a tax-deferred return of capital, which is applied against and will reduce the adjusted tax basis of your shares and, after such adjusted tax basis is reduced to zero, will generally constitute capital gains to you.

Under 2017 legislation commonly known as the Tax Cuts and Jobs Act ("TCJA"), "qualified REIT dividends" (i.e., ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income) are treated as eligible for a 20% deduction by noncorporate taxpayers. This deduction, if allowed in full, equates to a maximum effective tax rate of 29.6% (37% top rate applied to income after 20% deduction). A Fund may choose to report the special character of "qualified REIT dividends" to the shareholder, provided both the Fund and the shareholder meet certain holding period requirements with respect to its shares. A noncorporate shareholder receiving such dividends would treat them as eligible for the 20% deduction, provided the RIC shares were held by the shareholder for more than 45 days during the 91-day period beginning on the date that is 45 days before the date on which the shares become ex-dividend with respect to such dividend. The amount of a RIC's dividends eligible for the 20% deduction for a taxable year is limited to the excess of the RIC's qualified REIT dividends for the taxable year over allocable expenses.

Distributions of any net investment income and net realized capital gains will be taxable as described above, whether received in shares or in cash. Shareholders who choose to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received

equal to the NAV of a share on the reinvestment date. Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable as if received on December 31. Distributions are includable in alternative minimum taxable income in computing a noncorporate shareholder's liability for the alternative minimum tax.

Investment income received by a Fund from sources within foreign countries may be subject to foreign income tax withheld at the source and the amount of tax withheld generally will be treated as an expense of a Fund. The U.S. has entered into tax treaties with many foreign countries that entitle the Fund to a reduced rate of, or exemption from, tax on such income. Some countries require the filing of a tax reclaim or other forms to receive the benefit of the reduced tax rate; whether or when a Fund will receive the tax reclaim is within the control of the individual country. Information required on these forms may not be available to the Funds, such as shareholder information; therefore, the Funds may not receive the reduced treaty rates or potential reclaims. Other countries have conflicting and changing instructions and restrictive timing requirements which may cause the Funds not to receive the reduced treaty rates or potential reclaims. Other countries may subject capital gains realized by the Funds on sale or disposition of securities of that country to taxation. It is impossible to determine the effective rate of foreign tax in advance since the amount of the Funds' assets to be invested in various countries is not known.

A redemption of Fund shares may result in recognition of a taxable gain or loss and, if held as a capital asset, capital gain or loss. Any loss realized upon a redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains received on those shares. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent Fund shares are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

The Funds are required to report to you and the IRS annually on Form 1099-B the cost basis of shares purchased or acquired. However, cost basis reporting is not required for certain shareholders, including shareholders investing in the Funds through a tax-advantaged retirement account, such as a 401(k) plan or an individual retirement account. The Funds will calculate cost basis using the Funds' default method, unless you instruct the Funds to use a different calculation method. For additional information regarding the Funds' available cost basis reporting methods, including its default method, please contact the Funds. If you hold your Fund shares through a broker (or other nominee), please contact that broker (nominee) with respect to reporting of cost basis and available elections for your account.

Except in the case of certain exempt shareholders, if a shareholder does not furnish a Fund with its correct Taxpayer Identification Number and certain certifications or the Funds receive notification from the Internal Revenue Service requiring back-up withholding, the Funds are required by federal law to withhold federal income tax from the shareholder's distributions and redemption proceeds currently at a rate of 24% for U.S. residents.

Gain or loss recognized by the Funds on the sale or other disposition of portfolio investments will be a capital gain or loss. Such capital gain and loss may be long-term or short-term depending, in general, upon the length of time a particular investment position is maintained and, in some cases, upon the nature of the transaction. Property held for more than one year generally will be eligible for long-term capital gain or loss treatment. The application of certain rules described below may serve to alter the manner in which the holding period for a security is determined or may otherwise affect the characterization as long-term or short-term, and also the timing of the realization and/or character, of certain gains or losses.

A U.S. REIT is not subject to federal income tax on the income and gains it distributes to shareholders. Dividends paid by a U.S. REIT, other than capital gain distributions, will be taxable as ordinary income up to the amount of the U.S. REIT's current and accumulated earnings and profits. Capital gain dividends paid by a U.S. REIT to the Funds will be treated as long-term capital gains by the Funds and, in turn, may be distributed by the Funds to its shareholders as a capital gain distribution. Because of certain noncash expenses, such as property depreciation, an equity U.S. REIT's cash flow may exceed its taxable income. The equity U.S. REIT, and in turn the Funds, may distribute this excess cash to shareholders in the form of a return of capital distribution. However, if a U.S. REIT is operated in a manner that fails to qualify as a REIT, an investment in the U.S. REIT would become subject to double taxation, meaning the taxable income of the U.S. REIT would be subject to federal income tax at the corporate income tax rate without any deduction for dividends paid to shareholders and the dividends would be taxable to shareholders as ordinary income (or possibly as qualified dividend income) to the extent of the REIT's current and accumulated earnings and profits.

While non-U.S. REITs often use complex acquisition structures that seek to minimize taxation in the source country, an investment by the Funds in a non-U.S. REIT may subject the Funds, directly or indirectly, to corporate taxes, withholding taxes, transfer taxes and other indirect taxes in the country in which the real estate acquired by the non-U.S. REIT is located. The Funds' pro rata share of any such taxes will reduce the Funds' return on its investment. The Funds' investment in a non-U.S. REIT may be considered an investment in a PFIC, as discussed below. Additionally, foreign withholding taxes on distributions from the non-U.S. REIT may be reduced or eliminated under certain tax treaties. Also, the Funds in certain limited circumstances may be required to file an income tax return in the source country and pay tax on any gain realized from its investment in the non-U.S. REIT under rules similar to those in the United States which tax foreign persons on gain realized from dispositions of interests in U.S. real estate.

Investment in taxable mortgage pools (excess inclusion income). Under a Notice issued by the IRS, the Code and Treasury regulations to be issued, a portion of the Funds' income from a U.S. REIT that is attributable to the REIT's residual interest in a real estate mortgage investment conduit ("REMIC") or equity interests in a "taxable mortgage pool" (referred to in the Code as an excess inclusion) will be subject to federal income tax in all events. The excess inclusion income of a regulated investment company, such as the Funds, will be allocated to shareholders of the regulated investment company in proportion to the dividends received by such shareholders, with the same consequences as if the shareholders held the related REMIC residual interest or, if applicable, taxable mortgage pool directly. In general, excess inclusion income allocated to shareholders (i) cannot be offset by net operating losses (subject to a limited exception for certain thrift institutions), (ii) will constitute unrelated business taxable income ("UBTI") to entities (including qualified pension plans, individual retirement accounts, 401(k) plans, Keogh plans or other tax-exempt entities) subject to tax on UBTI, thereby potentially requiring such an entity that is allocated excess inclusion income, and otherwise might not be required to file a tax return, to file a tax return and pay tax on such income, and (iii) in the case of a foreign stockholder, will not qualify for any reduction in U.S. federal withholding tax. In addition, if at any time during any taxable year a "disqualified organization" (which generally includes certain cooperatives, governmental entities, and tax-exempt organizations not subject to UBTI) is a record holder of a share in a regulated investment company, then the regulated investment company will be subject to a tax equal to that portion of its excess inclusion income for the taxable year that is allocable to the disqualified organization, multiplied by the corporate income tax rate. The Notice imposes certain reporting requirements upon regulated investment companies that have excess inclusion income. There can be no assurance that the Fund will not allocate to shareholders excess inclusion income.

These rules are potentially applicable to a Fund with respect to any income it receives from the equity interests of certain mortgage pooling vehicles, either directly or, as is more likely, through an investment in a U.S. REIT.

The Funds' transactions in foreign currencies, foreign currency-denominated debt obligations and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned. This treatment could increase or decrease a Funds' ordinary income distributions to you, and may cause some or all of the Funds' previously distributed income to be classified as a return of capital. In certain cases, the Funds may make an election to treat such gain or loss as capital.

While securities are loaned out by a Fund, the Fund generally will receive from the borrower amounts equal to any dividends or interest paid on the borrowed securities. For federal income tax purposes, payments made "in lieu of" dividends are not considered dividend income. These distributions will neither qualify for the reduced rate of taxation for individuals on qualified dividends nor the 50% dividends-received deduction for corporations.

The Funds may invest in securities of foreign companies that may be classified under the Code as a passive foreign investment company ("PFIC"). In general, a foreign company is classified as a PFIC if at least one-half of its assets constitute investment-type assets or 75% or more of its gross income is investment-type income. When investing in PFIC securities, the Funds intend to mark-to-market these securities under certain provisions of the Code and recognize any unrealized gains as ordinary income at the end of the Funds' fiscal and excise tax years. Deductions for losses are allowable only to the extent of any current or previously recognized gains. These gains (reduced by allowable losses) are treated as ordinary income that the Funds are required to distribute, even though it has not sold or received dividends from these securities. You should also be aware that the designation of a foreign security as a PFIC security will cause its income dividends to fall outside of the definition of qualified foreign corporation dividends. These dividends generally will not qualify for the reduced rate of taxation on qualified dividends when distributed to you by the Fund. Foreign companies are not required to identify themselves as PFICs. Due to various complexities in identifying PFICs, the Funds can give no assurances that it will be able to identify portfolio securities in foreign corporations that are PFICs in time for the Funds to make a mark-to-market election. If the Funds are unable to identify an investment as a PFIC and thus do not make a mark-to-market election, the Funds may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such shares even if such income is distributed as a taxable dividend by the Funds to their shareholders. Additional charges in the nature of interest may be imposed on the Funds in respect of deferred taxes arising from such distributions or gains.

Foreign taxpayers (including nonresident aliens) are generally subject to a flat withholding rate, currently 30% on U.S. source income. This withholding rate may be lower under the terms of a tax convention.

This discussion and the related discussion in the Prospectus have been prepared by Fund management, and counsel to the Funds has expressed no opinion in respect thereof.

This section is not intended to be a full discussion of federal tax laws and the effect of such laws on you. There may be other federal, state, foreign or local tax considerations to a particular investor. You are urged to consult your own tax advisor.

Distributions

Each Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is a Fund's net investment income, substantially all of which will be distributed to the Fund's shareholders.

The amount of a Fund's distribution is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed, and is subject to the discretion of the Board. The Funds do not pay "interest" or guarantee any fixed rate of return on an investment in its shares.

A Fund may also derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain a Fund may realize from transactions involving investments held less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (to the extent not offset by any capital loss carryovers), although a distribution from capital gains, will be distributed to shareholders with and as a part of the distributions of net investment income giving rise to ordinary income. If during any year a Fund realizes a net gain on transactions involving investments held for the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, the Fund will have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital losses carried over from the eight previous taxable years) will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund's shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax advisor.

Any distribution paid by a Fund reduces that Fund's NAV per share on the date paid by the amount of the distribution per share. Accordingly, a distribution paid shortly after a purchase of shares by a shareholder would represent, in substance, a partial return of capital (to the extent it is paid on the shares so purchased), even though it would be subject to income taxes.

Distributions will be made in the form of additional shares of the Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of distributions by notifying the Transfer Agent in writing or by telephone. However, any such change will be effective only as to distributions for which the record date is five or more calendar days after the Transfer Agent has received the written request.

Financial Statements

As of the date of this SAI, the Kensington Active Advantage Fund had not yet commenced operations and, therefore, had not produced financial statements. Once available, you can obtain a copy of the financial statements contained in the Funds' Annual or Semi-Annual Report.

The Predecessor Funds' [annual reports](#) to shareholders for the fiscal year ended December 31, 2021 are separate documents and the financial statements, accompanying notes and report of the independent registered public accounting firm appearing therein, are incorporated by reference into this SAI.
